ManTech Selected for $28 Billion IDIQ Award to Provide Research, Development, Test and Evaluation Services for Defense and Federal Civilian Agencies

September 20, 2018

HERNDON, Va., Sept. 20, 2018 (GLOBE NEWSWIRE) -- ManTech (Nasdaq: MANT) today announced that it has been selected as an awardee on the $28 billion Information Analysis Center Multiple Award Contract (IAC MAC) by the Air Force Installation Contracting Agency (AFICA/KD) office located at Offutt Air Force Base, NE. AFICA awarded the contract on behalf of the DoD Information Analysis Center Program Management Officer (DoD IAC PMO) sponsored by the Defense Technical Information Center (DTIC), which provides Research, Development, Test and Evaluation (RDTE) operational services for defense and other government agencies.

Under the nine-year indefinite-delivery-indefinite quantity (IDIQ) award, ManTech will compete for task orders in Pool 1 with a value of $15 million or greater, to support a span of disciplines ranging from cyber and information technology to defense systems and homeland defense.

“The $28 billion IAC MAC benefits participating defense and federal civilian agencies by providing a single contract vehicle that supports a wide range of their research, development, test and evaluation needs,” said Kevin M. Phillips, President and CEO of ManTech. “DTIC’s initiative is a positive step toward streamlining the acquisition process for government agencies and contractors alike, and ManTech looks forward to this new opportunity to continue our company’s streak of major contract wins in 2018 and beyond.”

About DoD IAC Program

The DoD IAC PMO is sponsored by the Defense Technical Information Center, and provides technical data management and research support for DoD and federal government users. Established in the 1940s, the DoD IAC PMO program serves the DoD science & technology (S&T) and acquisition communities to drive innovation and technological developments by enhancing collaboration through integrated scientific and technical information development and dissemination for the DoD and broader S&T community.
