
**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-K

**ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d)
OF THE SECURITIES EXCHANGE ACT OF 1934**

For the fiscal year ended December 31, 2002

Commission File No. 000-49604

MANTECH INTERNATIONAL CORPORATION

(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation or organization)

22-1852179
(I.R.S. Employer
Identification No.)

12015 Lee Jackson Highway, Fairfax, VA 22033
(Address of principal executive offices)

(703) 218-6000
(Registrant's telephone number, including area code)

Securities registered pursuant to Section 12(b) of the Act:

| <u>Title of each class</u> | <u>Name of each exchange on which registered</u> |
|----------------------------|--|
| None | None |

Securities registered pursuant to Section 12(g) of the Act:

Class A Common Stock, Par Value \$0.01 Per Share

Indicate by check mark whether the registrant (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes No

Indicate by check mark if disclosure of delinquent filers pursuant to Item 405 of Regulation S-K is not contained herein, and will not be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is an accelerated filer (as defined in Exchange Act Rule 12b-2). Yes No

The aggregate market value of the voting stock held by non-affiliates of the Registrant as of June 30, 2002, was approximately \$385,000,000 (based on the closing price of \$23.99 per share on June 28, 2002, as reported by NASDAQ). For this computation, the Registrant used the total shares as of December 31, 2002 and excluded the market value of all shares of its common stock reported as beneficially owned by named executive officers and directors of the Registrant; such exclusion shall not be deemed to constitute an admission that any such person is an "affiliate" of the registrant.

Indicate the number of shares outstanding of each of the Registrant's classes of common stock, as of February 28, 2003: ManTech International Corp. Class A Common Stock, \$.01 par value, 16,283,173 shares; ManTech International Corp. Class B Common Stock, \$.01 par value, 15,631,004 shares.

DOCUMENTS INCORPORATED BY REFERENCE

Certain portions of the definitive Proxy Statement to be used in connection with the ManTech International Corporation 2003 Annual Meeting of stockholders, to be held on June 25, 2003, and to be mailed to stockholders of record as of April 30, 2003, are incorporated by reference into Items 10, 11, 12, and 13 of Part III of this Annual Report on Form 10-K.

PART I

ITEM 1. BUSINESS

This annual report contains forward-looking statements that involve substantial risks and uncertainties. You can identify these statements by forward-looking words such as “may,” “will,” “expect,” “intend,” “anticipate,” “believe,” “estimate,” “continue” and other similar words. You should read statements that contain these words carefully because they discuss the Company’s future expectations, make projections of the Company’s future results of operations or financial condition or state other “forward-looking” information. The Company believes that it is important to communicate the Company’s future expectations to its investors. However, there may be events in the future that the Company is not able to accurately predict or control. The factors listed in the sections captioned “Risks Related to the Company’s Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations,” as well as any cautionary language in this annual report, provide examples of risks, uncertainties and events that may cause the Company’s actual results to differ materially from the expectations the Company describes in its forward-looking statements.

Unless the context indicates otherwise, the terms “Company” and “ManTech” as used in Parts I and II, include both ManTech International Corporation and its consolidated subsidiaries. The term “Registrant”, as used in Parts I and II, refers to ManTech International Corporation only.

Business Overview

ManTech International Corporation delivers a broad array of information technology and technical services solutions to U.S. federal government customers, focusing primarily on critical national defense programs for the intelligence community and Department of Defense. With 2002 revenue of \$500.2 million, ManTech designs, develops, procures, implements, operates, tests and maintains mission-critical, enterprise information technology and communication systems and intelligence processing infrastructures for the Company’s federal government customers. Many of the Company’s 4,436 employees have military or intelligence experience and high level security clearances that allows the Company to work with its customers in highly classified environments and at front-line deployments in the United States and 34 countries globally.

The Company was founded in 1968 and has exhibited strong growth and profitability since 1980 largely as a result of successful long-standing relationships with its customers, having supported many of them for 15 to 30 years. For the years ended December 31, 2002, 2001 and 2000, approximately 86.7%, 85.1% and 84.0%, respectively, of the Company’s revenues were derived from its customers in the intelligence community and Department of Defense. These customers include the Office of the Secretary of Defense; the Department of State; various intelligence agencies; the U.S. Army, Navy, Air Force and Marine Corps; and joint military commands. The Company also provides solutions to federal government civilian agencies, including NASA, EPA and the Departments of Justice, Commerce and Energy, as well as to state and local governments and commercial customers.

ManTech’s Services

The Company delivers comprehensive information technology and technical services solutions for mission-critical, enterprise information technology and communication systems through three principal areas of expertise, which are offered separately or in combination across the Company’s customer base:

Secure Systems and Infrastructure Solutions

The Company provides a broad range of solutions to enhance systems and network availability and mission-critical performance of its customers’ hardware, software, computer, network and telecommunication assets, including:

Intelligence Operations. The Company provides services for strategic and tactical intelligence systems, networks and facilities in support of the intelligence community and Department of Defense. To support classified systems and facilities designed to collect, analyze, process and report on signals intelligence, the Company develops and integrates advanced signal processing systems and new signal processing techniques. The Company’s intelligence-related services also include the design, rapid development and prototyping, integration and management of real-time signal processing systems. For example, when an adversary implements a new communication technique or protocol, the Company provides rapid prototyping and re-engineering services, which enable its customers in the intelligence community to decipher and exploit the communications.

Communication Systems and Infrastructure Support. The Company designs, develops, modifies and maintains secure communication systems and network infrastructures. This process involves evaluating industry standards, systems architectures and applications in order to recommend and develop technology solutions and integrate them into a customer’s secure

communication systems. The Company also procures, installs and tests new voice, data and video communication systems. For example, the Company provided a comprehensive communication network infrastructure and systems solution in relocating, re-establishing and upgrading a major military command headquarters from Panama to Miami, Florida. The Company integrated the customer's classified and unclassified information processing and telecommunication network without disruption to the command mission.

Safeguarding Critical Infrastructures. The Company identifies potential foreign and domestic threats, including terrorism, to quantify exposure to the threats and recommend prudent countermeasures. The Company's capabilities include threat definition and modeling, vulnerability identification, adversary characterization, lethal force defense analysis, security life-cycle planning and management, physical and cyber countermeasure optimization techniques and operations security assessments. For example, to assist the Department of State in addressing the requirements of Presidential Decision Directive 63, which requires all government agencies to identify and safeguard critical infrastructures from all forms of threats, the Company provides on-going support in the department-wide vulnerability assessments of their critical infrastructure and resources and performs worldwide network management and other integrated security services.

Information Assurance. The Company provides comprehensive information assurance programs that assess and implement integrated physical, technical, operations, personnel, computer and communication security requirements, including disaster recovery assessment. The Company's services include systems security architecture development, test and evaluation, certification and accreditation support and compliance audits and inspections. The Company offers information assurance support for both classified and unclassified systems. For example, for the Department of State, the Company designs and implements networks and host-based intrusion detection programs that are compatible with their evolving virtual private network architecture.

Secrecy Management and Program Security Architecture. The Company provides secrecy management and security infrastructure services for highly classified programs including intelligence operations and military programs. Due to the highly sensitive and classified nature of these programs, opportunities are often limited to a select number of providers that possess the requisite capabilities, qualifications and special access clearances. The Company's involvement in these programs often begins in the initial or concept phase. The Company identifies critical elements that require protection and then helps design the program to protect those critical elements throughout the program life cycle. The Company provides secrecy and security services including vulnerability assessment, exposure analysis, secrecy architecture design, security policy development and implementation, life cycle acquisition program security, system security engineering, security awareness and training, comprehensive security support services and technical certification and accreditation services. For example, the Company provides special access security support to the Joint Strike Fighter Program and the Department of Defense Counterintelligence Field Activity Office.

Information Technology Solutions

The Company provides a broad range of information technology solutions to its customers, including:

Systems integration services. The Company performs comprehensive systems integration of hardware and software components for the Company's government and commercial customers using commercial products and its customers' proprietary software and legacy applications. The Company analyzes customer information systems, applications and platforms and develops solutions to sustain or extend systems performance and availability. For example, as a subcontractor on the Navy-Marine Corps Intranet program, the Company is transitioning legacy software applications to a standardized, end-to-end systems infrastructure for voice, video and data. This includes support of over 10,000 critical legacy business applications serving 350,000 Navy personnel, which must be migrated to the new program architecture. The Company also develops and provides specialized training programs for information systems, including interactive electronic training and technical manuals and enterprise-wide distance learning programs. The Company is working with the Internal Revenue Service's General Business Institute to design, develop and implement a web-based training management and delivery solution that provides access to more than 100 training courses via their intranet or the Internet.

In addition, the Company performs database conversion and application migration services for its customers. For example, the Company developed a software tool that enhances its database conversion and application migration services. This solution automates the database conversion process to enable better, faster and less expensive conversions and migrations.

Enterprise application solutions. The Company designs, develops, implements, tests, maintains and web enables software applications for its customers' information systems and network infrastructures. The Company provides comprehensive e-commerce services, including web development efforts, that focus on designing and maintaining scalable, interoperable, reliable and portable end-to-end information management solutions. The Company's e-commerce services also include global web-based collaboration, electronic cataloging, automated document imaging and business process re-engineering. For example, as part of the Company's business process re-engineering services, the Company is working with the Office of the Secretary of Defense to develop industry-wide electronic data interchange standards.

The Company designs, develops and implements electronic data interchange solutions, which enable different entities to communicate and execute orders and transactions electronically. For example, the Company developed an electronic data interchange solution for the Defense Commissary Agency, which operates over 370 commissaries worldwide. The Company also currently provides a web-based integrated solution for managing millions of vital records that document births, deaths, marriages and divorces for several state and local governments.

The Company's information technology solutions allow end-users insight into and control over supply chain management. The Company has developed and implemented logistics management information systems for the Navy for more than 20 years, including the sophisticated Naval Aviation Logistics Command Management Information System application, which is used on every ship in the Navy and at over 450 shore facilities. The Company has also expanded its services for the Navy in this area so that it now develops, maintains and provides continuous systems process improvements for 19 other information systems as part of the Navy Tactical Command Support System, which automates numerous logistics functions. Applications the Company designed for the Navy have been adopted for use by other agencies, including the Marine Corps, the White House Communications Agency and three NASA centers.

Systems/network maintenance services. The Company has extensive experience in maintaining a wide range of information management resources for its customers. The Company performs comprehensive systems administration, including 24x7 support for continuous mission operations. For example, for the Army, the Company provides systems administration and help desk functions at a domestic location for a command and management system, as well as help desk functions in an overseas remote location that supports 1,500 users. For this customer, the Company also provides on-site support for the command and management system workstations and networks located throughout countries in Central and South America.

Systems Engineering Solutions

The Company offers its customers a broad range of systems engineering solutions, including:

Systems engineering services. The Company performs comprehensive systems engineering services to analyze and develop solutions for customer hardware and software requirements. The Company also evaluates existing systems designs to determine if performance enhancements or cost savings can be derived through the integration of current technologies. For more than 15 years, the Company has provided a broad range of systems engineering services to analyze acoustic data requirements and develop instrumentation to assist the Navy in maintaining or increasing the acoustical advantages of U.S. submarines. As part of these services, the Company has developed a wide range of hull-mounted and towed array sonar systems and acoustic measurement systems. The Company also provides systems engineering and technical services that support the design and installation of communication, intelligence, electronic warfare and information systems aboard Navy and Coast Guard ships and at shore-based facilities.

Testing and evaluation. For the past three decades, the Company has tested complex and mission-critical hardware and software systems used by the Army, Navy and NASA. The Company has played key roles in improving the performance, reliability, maintainability, supportability and weapons effectiveness of in-service rotary and fixed wing platforms, including the F/A-18E/F Super Hornet, and their associated ordnance. The Company is participating in development of plans for testing and evaluating the Joint Strike Fighter. The Company also performs submarine and surface ship acoustical trials to evaluate stealth abilities and to maintain the acoustical credibility of U.S. submarines. The Company has performed acoustic testing for every operational class of Navy combat vessel, both surface and submarine, in use today.

Through its work at NASA's Goddard Space Flight Center, the Company's space payload test and integration services have supported every in-house earth orbit program since 1971. The Company conducts a broad range of tests, including structural, acoustics, vibration, space simulation and electromagnetic tests, to certify that all flight hardware can withstand the extreme conditions of space flight. The Company has won recognition within both Goddard and the NASA community for its test, integration, transportation and launch site support of the Hubble Space Telescope repair and servicing missions. For example, the Company received the Goddard Contractor Excellence Award for 2000.

The Company also designs, manufactures and produces automated test technology for military and commercial customers. For example, the Company is the prime contractor for the U.S. Marine Corps Third Echelon Test System, a mobile testing platform that is designed to provide electronic repair support on the front lines of the battlefield.

The Company's services also include its environmental science, toxicology and ecology research and development services for the EPA, including assessing the human health impacts of a wide variety of airborne and waterborne contaminants, monitoring and predicting exposures, understanding exposure routes in the event of a release of chemicals or biological agents and modeling migration strategies to predict the movement of airborne and waterborne contaminants. In response to the September 11, 2001

terrorist attacks, the Company was asked by the EPA's National Exposure Research Laboratory to assemble and calibrate equipment for monitoring pollutants released around the collapsed World Trade Center complex. In less than 48 hours, the Company defined monitoring needs and configured equipment in a mobile laboratory that was delivered to the World Trade Center site to collect and evaluate samples of contaminants.

Independent validation and verification. The Company performs tests to certify that new systems or upgraded systems operate in accordance with their design requirements. For example, the Company has performed certification services for aircraft weapon systems in support of U.S. Naval Air Systems Command programs.

ManTech's Customers

The Company's customers include U.S. federal government intelligence, military and civilian agencies, state and local governments and commercial customers. The Company has successful, long-standing relationships with its customers, having supported many of them for 15 to 30 years. Representative customers include:

- *Intelligence and Department of Defense Customers*
 - Office of the Secretary of Defense
 - U.S. Army, Navy, Air Force and Marine Corps
 - Multiple Intelligence and Classified Agencies
 - Department of State
 - National Reconnaissance Office
 - Defense Information Systems Agency
 - Defense Logistics Agency
 - Defense Commissary Agency
 - Joint Interoperability Test Command

- *Civilian Agencies or Departments*
 - Department of Energy
 - Department of Justice
 - National Aeronautics and Space Administration
 - Environmental Protection Agency
 - Internal Revenue Service
 - National Institutes of Health, including the National Cancer Institute

The Company's revenues derived from its federal government customers, consisting primarily of customers in the intelligence community and Department of Defense, accounted for approximately 96.3%, 96.2% and 96.1% of its revenues for 2002, 2001 and 2000, respectively. The Company's federal government customers typically exercise independent contracting authority, and even offices or divisions within an agency or department may directly, or through a prime contractor, use the Company's services as a separate customer so long as that customer has independent decision-making and contracting authority within its organization. For example, under a blanket purchasing agreement with one of the Army's contracting agencies, program managers throughout the Army and from other services and defense agencies are able to purchase a wide range of the Company's solutions. Even though task orders under this agreement together accounted for 10.0% of the Company's revenues for the year ended December 31, 2002, no one task order represented more than 2.5% of the Company's revenues during that period.

For 2002 and 2001, the Company derived 9.2% and 8.1%, respectively, of its revenues through relationships with prime contractors, who contract directly with the customer and subcontract to the Company.

Foreign Operations

In 2002, 99.4% of the Company's revenue was derived from services provided under contracts with U.S.-based customers and 0.6% of 2002 revenue came from contracts with foreign customers. In 2001, 98.6% and 1.4% of revenue was derived from services provided for U.S. and foreign-based customers, respectively. In 2000, 98.7% and 1.3% of revenue was derived from services provided for U.S. and foreign-based customers, respectively. The Company treats sales to United States government customers as sales within the United States, regardless of where the services are performed.

Backlog and GSA Schedule Contract Value

At December 31, 2002, the Company's backlog was \$1,354.8 million, of which \$196.7 million was funded backlog. At December 31, 2001, the Company's backlog was \$907.5 million, of which \$206.8 million was funded backlog. In addition, the Company estimates its GSA schedule contract value at December 31, 2002 was \$914.8 million. At December 31, 2001, the Company

estimates its GSA schedule contract value was \$864.8 million. Backlog, funded backlog and GSA schedule contract value represent estimates that the Company calculates on the bases described below. The Company expects that more than 94.0% of its funded backlog at December 31, 2002 will be recognized as revenues prior to December 31, 2003.

The Company defines backlog as its estimate of the remaining future revenues from existing signed contracts, assuming the exercise of all options relating to such contracts and including executed task orders issued under GSA schedule contracts. This includes an estimate of revenues for solutions that the Company believes it will be asked to provide in the future under the terms of executed multiple-award contracts in which the Company is not the sole provider, meaning that the customer could turn to companies other than ManTech to fulfill the contract. It also includes an estimate of revenues from indefinite delivery, indefinite quantity contracts, which specify a maximum, but only a token minimum, amount of goods or services that may be provided under the contract. Backlog does not include the value for contracts where the Company has been given permission by the customer to begin or continue working, but where a formal contract or contract extension has not yet been signed.

The Company defines funded backlog to be the portion of backlog for which funding currently is appropriated and allocated to the contract by the purchasing agency or otherwise authorized for payment by the customer upon completion of a specified portion of work. The Company's funded backlog does not include the full value of its contracts, because Congress often appropriates funds for a particular program or contract on a yearly or quarterly basis, even though the contract may call for performance that is expected to take a number of years.

At December 31, 2002, the Company's backlog included \$270.0 million of revenues for solutions pursuant to task orders that have been executed under GSA schedule contracts, of which \$63.4 million was included in funded backlog. The amount of the Company's revenues generated under GSA schedule contracts has increased in recent years. Specifically, for the years ended December 31, 2002, 2001 and 2000, funded awards under GSA schedule contracts were \$177.5 million, \$155.6 million and \$135.2 million, respectively. The Company believes that potential GSA schedule contract revenues are not fully reflected in traditional backlog calculations because, as described below, while GSA schedule contracts provide the Company's customers with the flexibility to obtain the Company's solutions through a streamlined procurement process, they do not provide for fixed, minimum or maximum purchase commitments. Therefore, the Company has developed a method of calculating GSA schedule contract value that it uses to evaluate estimates for the amount of revenues that it may receive under its GSA schedule contracts. For these purposes, the Company determines GSA schedule contract value by multiplying the average monthly amount of funded work that it has been awarded under each of its GSA schedule contracts over the past twelve months, by the number of months remaining in the term of those contracts, including under existing options, except that the Company does not take into account remaining contract terms of more than 72 months.

GSA schedule contracts are competitively awarded government-wide acquisition contracts negotiated and awarded by the General Services Administration and effectively act as fixed-price or time-and-materials contracts which government agencies may, but are not required to, use to purchase professional services and information technology products at predetermined ceiling prices, terms and conditions. Many of the Company's customers are authorized to use GSA schedule contracts through blanket purchase agreements, which operate similarly to GSA schedule contracts by permitting one or more federal agencies to purchase professional services or products from technology service providers at predetermined prices, terms and conditions. GSA schedule contracts are master agreements that do not, by themselves, authorize the delivery of services or products. Therefore, even though the Company has been awarded a GSA schedule contract or blanket purchase agreement, it often must actively solicit post-award sales, and it remains difficult for it to estimate the amount of work, if any, it will obtain under the contract.

GSA schedule contracts benefit the Company's federal government customers in a number of ways. First, they provide customers a streamlined means to competitively obtain professional services and technology products, allowing for a more efficient and timely procurement process. Second, because the Company must actively promote its services and technology to obtain work under these types of agreements, the customer benefits from continued competition. Third, as with fixed-price or time-and-materials contracts, GSA schedule contracts shift the risks of cost overruns to the technology service provider and promote effective contract management and cost-efficiencies by allowing the technology service provider to receive the benefit of cost savings that it generates. Although the Company must compete for or solicit individual task orders under GSA schedule contracts, it has found that GSA schedule contracts benefit companies such as ManTech that can respond quickly to emerging customer requirements and can manage contract performance efficiently. Finally, as with traditional fixed-price contracts, GSA schedule contracts involve greater financial risk, but the Company believes they offer opportunities for higher profitability because the Company bears the impact of cost overruns and receives the benefit of cost savings.

Changes in the amount of the Company's backlog, funded backlog and GSA schedule contract value result from potential future revenues from the execution of new contracts or the extension of existing contracts, reductions from contracts that end or are not renewed, reductions from the early termination of contracts, and adjustments to estimates of previously included contracts. Changes in the amount of the Company's funded backlog and GSA schedule contract value also are affected by the funding cycles of the government. These estimates of future revenues are necessarily inexact and the receipt and timing of any of these

revenues is subject to various contingencies, many of which are beyond the Company's control. The actual accrual of revenues on programs included in backlog, funded backlog and GSA schedule contract value may never occur or may change because a program schedule could change or the program could be canceled, a contract could be modified or canceled, an option that the Company has assumed would be exercised is not exercised or initial estimates regarding the level of solutions that the Company may provide could prove to be wrong. For the same reason, the Company believes that period-to-period comparisons of backlog, funded backlog and GSA schedule contract value are not necessarily indicative of future revenues that it may receive.

Employees

As of December 31, 2002, the Company had 4,436 employees.

Over 4,000 of the Company's employees are technical and service professionals and managers, and over 400 are in administrative or executive functions. Approximately 185 of the Company's employees, all of whom are located at NASA's Goddard Space Flight Center, are represented by the International Brotherhood of Electrical Workers union under a collective bargaining agreement which is due to expire in June 1, 2005. The Company has not experienced any work stoppage or strike by these employees.

The Company believes it is successful in retaining its employees by offering competitive salary structures, attractive incentive compensation and benefits programs, career growth opportunities, flexible work assignments and the opportunity to perform mission-critical services, often in classified environments. The Company's current employees are offered an opportunity to respond to new job opportunities before the Company pursues external recruiting. The Company considers its relations with employees to be good.

Seasonality and Cyclicity

The Company believes that its business may be subject to seasonal fluctuations. The federal government's fiscal year end can trigger increased purchase requests from customers for equipment and materials. Any increased purchase requests the Company receives as a result of the federal government's fiscal year end would serve to increase the Company's fourth quarter revenues but will generally decrease profit margins for that quarter, as these activities typically are not as profitable as the Company's normal service offerings. In addition, expenditures by the Company's customers tend to vary in cycles that reflect overall economic conditions as well as budgeting and buying patterns. The Company's revenue has in the past been, and may in the future be, materially affected by a decline in the defense budget or in the economy in general. Such future declines could alter the Company's current or prospective customers' spending priorities or budget cycles or extend the Company's sales cycle.

Corporate History

The Company is a corporation incorporated in Delaware and is the successor by merger to ManTech International Corporation, a New Jersey corporation. As a result of the merger, the Company reincorporated from New Jersey to Delaware and recapitalized its common stock. The Company's predecessor corporation had three classes of stock outstanding prior to the effective date of the merger: Class A common stock, Class B common stock and Class C common stock, of which the Class B common stock was redeemable and, therefore, not counted as equity for accounting purposes. On the effective date of the merger, each outstanding share of the New Jersey corporation's common stock was exchanged for one share of the Company's Class A common stock or for one share of the Company's Class B common stock. Immediately after the merger, the Company effected a 16.3062-for-one stock split of the Company's Class A common stock and Class B common stock. The holders of each share of Class A common stock are entitled to one vote per share, and the holders of each share of Class B common stock are entitled to ten votes per share. For purposes of this report, unless stated otherwise, all references to common stock refer to shares of the Delaware corporation after giving effect to the reincorporation, recapitalization and stock split, other than with respect to the historical consolidated financial statements.

The Company completed its initial public offering of Class A common stock on February 12, 2002, raising net proceeds of approximately \$110.2 million for the Company. The Company completed its follow-on public offering of Class A common stock on December 20, 2002, raising net proceeds of approximately \$90.9 million for the Company. The Registrant's Class A common stock is traded on the NASDAQ Stock Market's National Market under the symbol "MANT".

Competition

The Company believes that the major competitive factors in its market are distinctive technical competencies, intelligence and military work experience, price of services, successful past contract performance, reputation for quality and key management with domain expertise. The Company's key competitors currently include divisions of large defense contractors, such as BAE SYSTEMS, plc, Lockheed Martin Corporation, Northrop Grumman Corporation, Raytheon Company and TRW Inc., as well as

information technology service companies, such as Affiliated Computer Systems, Inc., Anteon International Corporation, Booz Allen & Hamilton, CACI International, Inc., Computer Sciences Corporation, DynCorp, Electronic Data Systems Corporation, Science Applications International Corporation, Titan Corporation, Unisys Corporation and Veridian Corporation.

Recent Developments

Acquisition of Integrated Data Systems. On February 28, 2003, the Company acquired Integrated Data Systems (IDS), a Virginia-based software development and systems integration/networking services company supporting national intelligence and Department of Defense customers. Under the terms of the merger agreement, IDS became a wholly owned subsidiary of ManTech International Corporation operating under the new name ManTech Integrated Data Systems Corporation. The Company paid \$57.7 million in cash plus approximately \$5.0 million in estimated purchase price adjustments to acquire IDS. The transaction is also subject to an earnout provision. The acquisition also provides a cash tax savings to the Company due to the deductibility of goodwill and related intangibles of approximately \$22.5 million over 15 years. The goodwill is deductible because the shareholders of IDS made a section 338(h)(10) election under the federal Tax Code. The revenues of IDS for calendar year 2002 were approximately \$40.0 million, up from \$21.0 million in 2001. The Company funded the acquisition using proceeds from its follow-on public offering completed in December 2002. IDS delivers technology solutions and products in four core areas: software development, systems engineering/networking, information assurance, and government acquisition/procurement support software. IDS has developed secure, advanced messaging and collaboration applications and solutions in support of a wide variety of national security networks and systems. IDS is also one of Microsoft's leading certified partners supporting U.S. Government classified intelligence community programs. Many of the 230 IDS employees have military or intelligence experience.

Acquisition of MSM Security Services, Inc. The Company acquired MSM Security Services, Inc. (MSM), a Maryland-based provider of Personnel Security Investigation (PSI) services to the U.S. Government, effective March 1, 2003. Under the terms of the merger agreement, MSM became a wholly owned subsidiary of ManTech International Corporation operating under the new name ManTech MSM Security Services, Inc. The Company paid \$1.9 million in cash and the repayment at closing of existing MSM debt of \$2.7 million. The purchase price is subject to certain post-closing adjustments and also includes an earnout provision. MSM's revenue in calendar year 2002 was approximately \$19.9 million. The Company funded this acquisition using proceeds from its follow-on public offering completed in December 2002. MSM specializes in PSI services for the United States Government, having completed over 250,000 background investigations since its founding in 1978. MSM employs approximately 100 staff. MSM also developed and maintains a nationwide network of approximately 1,800 experienced contract investigators that support the company's mission. MSM has active investigation contracts to support the United States Customs Service, Defense Security Service (DSS), the intelligence community, and other federal government agencies.

Company Information Available on the Internet

The Company's internet address is www.mantech.com. The Company makes available free of charge through its internet site, via a hyperlink to the U.S. Securities and Exchange Commission EDGAR filings web site, its annual reports on Form 10-K; quarterly reports on Form 10-Q; current reports on Form 8-K; and any amendments to those reports filed or furnished pursuant to the Securities Exchange Act of 1934, or the "Exchange Act," as soon as reasonably practicable after such material is electronically filed with, or furnished to, the U.S. Securities and Exchange Commission.

Risks Related to The Company's Business

The Company is dependent on contracts with the U.S. Federal Government for substantially all of its revenues.

The Company expects that federal government contracts will continue to be the primary source of its revenues for the foreseeable future. The Company's revenues derived from its federal government customers, consisting primarily of customers in the intelligence community and Department of Defense, accounted for approximately 96.3%, 96.2% and 96.1% of its revenues for 2002, 2001 and 2000, respectively. If the Company was suspended or debarred from contracting with the federal government generally, or any significant agency in the intelligence community or Department of Defense, if the Company's reputation or relationship with government agencies were impaired, or if the government otherwise ceased doing business with the Company or significantly decreased the amount of business it does with the Company, the Company's business, prospects, financial condition or operating results could be materially harmed.

Federal government spending priorities may change in a manner adverse to the Company's business.

The Company's business depends upon continued federal government expenditures on intelligence, defense and other programs that the Company supports. The overall U.S. defense budget declined from time to time in the late 1980s and the early 1990s. While spending authorizations for intelligence and defense-related programs by the government have increased in recent years, and in particular after the September 11, 2001 terrorist attacks, future levels of expenditures and authorizations for those programs may decrease, remain constant or shift to programs in areas where the Company does not currently provide services. A significant decline in government expenditures, or a shift of expenditures away from programs that the Company supports, could adversely

affect the Company's business, prospects, financial condition or operating results.

Federal government contracts contain provisions that are unfavorable to the Company.

Federal government contracts contain provisions and are subject to laws and regulations that give the government rights and remedies not typically found in commercial contracts, including allowing the government to:

- Terminate existing contracts for convenience, as well as for default;
- Reduce or modify contracts or subcontracts;
- Cancel multi-year contracts and related orders if funds for contract performance for any subsequent year become unavailable;
- Decline to exercise an option to renew a multi-year contract;
- Claim rights in products and systems produced by the Company;
- Suspend or debar the Company from doing business with the federal government or with a governmental agency; and
- Control or prohibit the export of the Company's products.

If the government terminates a contract for convenience, the Company may recover only its incurred or committed costs, settlement expenses and profit on work completed prior to the termination. If the government terminates a contract for default, the Company may not recover even those amounts, and instead may be liable for excess costs incurred by the government in procuring undelivered items and services from another source. As is common with government contractors, some of the Company's contracts have had or are currently experiencing performance issues. The Company has received and may in the future receive show cause or cure notices under contracts that, if not addressed to the government's satisfaction, could give the government the right to terminate those contracts for default or to cease procuring the Company's services under those contracts in the future.

The Company must comply with complex procurement laws and regulations.

The Company must comply with and is affected by laws and regulations relating to the formation, administration and performance of federal government contracts, which affect how it does business with its customers and may impose added costs on its business. For example, the Company is subject to the Federal Acquisition Regulations and all supplements, which comprehensively regulate the formation, administration and performance of federal government contracts, and to the Truth in Negotiations Act, which requires certification and disclosure of cost and pricing data in connection with contract negotiations. The Company's performance under its federal government contracts and its compliance with the terms of those contracts are subject to periodic review by the Company's contracting agency customers. In addition, the Company routinely conducts its own internal reviews relating to its performance under the Company's federal government contracts and its compliance with their terms. From time to time, such internal reviews and reviews by government contracting agencies result in discoveries by the Company or by the Company's government contract customers of occurrences of non-compliance by the Company with the terms of its contracts. If a government review or investigation uncovers improper or illegal activities, the Company may be subject to civil or criminal penalties or administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or debarment from doing business with federal government agencies, and may suffer reputational harm which could impair the Company's ability to win awards of contracts in the future or receive renewals of existing contracts. If the Company is subject to civil and criminal penalties and administrative sanctions or suffers reputational harm, its business, prospects, financial condition or operating results could be materially harmed. From time to time in the past, the Company has been subject to government investigations. Currently, it is subject to certain government investigations. For additional information regarding these investigations, see "Item 3—Legal Proceedings." In addition, the Company is subject to industrial security regulations of Department of Defense and other federal agencies that are designed to safeguard against foreigners' access to classified information. If the Company were to come under foreign ownership, control or influence, its federal government customers could terminate or decide not to renew its contracts, and it could impair the Company's ability to obtain new contracts. The government may reform its procurement practices or adopt new contracting rules and regulations, including cost accounting standards, that could be costly to satisfy or that could impair the Company's ability to obtain new contracts.

The Company faces competition from other firms, many of which have substantially greater resources.

The Company operates in highly competitive markets and generally encounters intense competition to win contracts. The Company competes with many other firms, ranging from small, specialized firms to large diversified firms, many of which have substantially greater financial, management and marketing resources than the Company does. The Company's competitors may be able to provide the Company's customers with different or greater capabilities or benefits than the Company can provide in areas such as technical qualifications, past contract performance, geographic presence, price and the availability of key professional personnel. The Company's failure to compete effectively with respect to any of these or other factors could have a material adverse effect on its business, prospects, financial condition or operating results. In addition, the Company's competitors also

have established or may establish relationships among themselves or with third parties to increase their ability to address the Company's customers' needs. Accordingly, it is possible that new competitors or alliances among competitors may emerge.

The Company derives significant revenues from contracts awarded through a competitive bidding process.

The Company derives significant revenues from federal government contracts that were awarded through a competitive bidding process. For example, after giving effect to the Company's acquisition of ManTech Aegis Research Corporation and ManTech CTX Corporation, in each of the past three fiscal years, nine out of the Company's ten largest contracts, in terms of revenues, were awarded through a competitive bidding process. Much of the business that the Company expects to seek in the foreseeable future likely will be awarded through competitive bidding. Competitive bidding presents a number of risks, including the:

- Need to bid on programs in advance of the completion of their design, which may result in unforeseen technological difficulties and cost overruns;
- Substantial cost and managerial time and effort that the Company spends to prepare bids and proposals for contracts that may not be awarded to the Company;
- Need to accurately estimate the resources and cost structure that will be required to service any contract the Company is awarded; and
- Expense and delay that may arise if the Company's competitors protest or challenge contract awards made to the Company pursuant to competitive bidding, and the risk that any such protest or challenge could result in the resubmission of bids on modified specifications, or in termination, reduction or modification of the awarded contract.

The Company may not be provided the opportunity in the near term to bid on contracts that are held by other companies and are scheduled to expire if the government determines to extend the existing contract. If the Company is unable to win particular contracts that are awarded through the competitive bidding process, it may not be able to operate in the market for services that are provided under those contracts for a number of years. If the Company is unable to consistently win new contract awards over any extended period, its business and prospects will be adversely affected.

Failure to maintain strong relationships with other contractors could result in a decline in the Company's revenues.

For the years ended December 31, 2002 and 2001, the Company derived 9.2% and 8.1%, respectively, of its revenues from contracts in which it acted as a subcontractor to other contractors or to joint ventures which the Company and other contractors have formed to bid on and execute particular contracts or programs. The Company expects to continue to depend on relationships with other contractors for a portion of its revenues in the foreseeable future. The Company's business, prospects, financial condition or operating results could be adversely affected if other contractors eliminate or reduce their subcontracts or joint venture relationships with the Company, either because they choose to establish relationships with the Company's competitors or because they choose to directly offer services that compete with the Company's business, or if the government terminates or reduces these other contractors' programs or does not award them new contracts.

The Company may not receive the full amount authorized under contracts that it has entered into and may not accurately estimate its backlog and GSA schedule contract value.

The maximum contract value specified under a government contract that the Company enters into is not necessarily indicative of revenues that it will realize under that contract. For example, the Company derives some of its revenues from government contracts in which the Company is not the sole provider, meaning that the government could turn to other companies to fulfill the contract, and from indefinite delivery, indefinite quantity contracts, which specify a maximum but only a token minimum amount of goods or services that may be provided under the contract. In addition, Congress often appropriates funds for a particular program on a yearly basis, even though the contract may call for performance that is expected to take a number of years. As a result, contracts typically are only partially funded at any point during their term, and all or some of the work to be performed under the contracts may remain unfunded unless and until Congress makes subsequent appropriations and the procuring agency allocates funding to the contract. Nevertheless, the Company looks at these contract values, including values based on the assumed exercise of options relating to these contracts, in estimating the amount of the Company's backlog. Because the Company may not receive the full amount it expects under a contract, the Company may not accurately estimate its backlog. Similarly, in recent years the Company has been deriving an increasing percentage of its revenues under GSA schedule contracts. GSA schedule contracts are procurement vehicles under which government agencies may, but are not required to, purchase professional services or products. As a result, the Company believes that potential GSA schedule contract values are not fully reflected in traditional backlog calculations. The Company has developed a method of calculating GSA schedule contract value that it uses to evaluate estimates for the revenues it may receive under its GSA schedule contracts. Although the Company believes its method of determining GSA schedule contract value is based on reasonable estimates and assumptions, its experience with GSA schedule contracts has been limited to date. The Company is not currently aware of other companies within the Company's market that employ comparable methods of determining GSA schedule contract value. Estimates of future revenues

included in backlog and GSA schedule contract value are not necessarily precise and the receipt and timing of any of these revenues are subject to various contingencies, many of which are beyond the Company's control. For a discussion of these contingencies see "Item 1—Business: Backlog and GSA Schedule Contract Value." The actual accrual of revenues on programs included in backlog and GSA schedule contract value may never occur or may change.

The Company may not accurately estimate the expenses, time and resources necessary to satisfy its contractual obligations.

The Company enters into three types of federal government contracts for its services: cost-plus, time-and-materials and fixed-price. For the year ended December 31, 2002, the Company derived 38.5%, 45.1% and 16.4% of its revenues from cost-plus, time-and-materials and fixed-price contracts, respectively. For 2001, the revenues were 35.2%, 36.2% and 28.6%, respectively. Under cost-plus contracts, the Company is reimbursed for allowable costs and paid a fee, which may be fixed or performance-based. To the extent that the actual costs incurred in performing a cost-plus contract are within the contract ceiling and allowable under the terms of the contract and applicable regulations, the Company is entitled to reimbursement of its costs, plus a profit. However, if the Company's costs exceed the ceiling or are not allowable under the terms of the contract or applicable regulations, it may not be able to recover those costs. Under time-and-materials contracts, the Company is reimbursed for labor at negotiated hourly billing rates and for certain expenses. The Company assumes financial risk on time-and-material contracts because it assumes the risk of performing those contracts at negotiated hourly rates. Under fixed-price contracts, the Company performs specific tasks for a fixed price. Compared to cost-plus contracts, fixed-price contracts generally offer higher margin opportunities, but involve greater financial risk because the Company bears the impact of cost overruns and receives the benefit of cost savings. The Company's profits could be adversely affected if its costs under any of these contracts exceed the assumptions it used in bidding for the contract. Although the Company believes that it has recorded adequate provisions in its consolidated financial statements for losses on its contracts, as required under U.S. generally accepted accounting principles, the Company's contract loss provisions may not be adequate to cover all actual losses that the Company may incur in the future.

The Company's contracts are subject to audits and cost adjustments by the federal government.

The federal government audits and reviews the Company's performance on contracts, pricing practices, cost structure and compliance with applicable laws, regulations and standards. Like most large government contractors, the Company's contract costs are audited and reviewed on a continual basis. Although audits have been completed on the Company's incurred contract costs through 2000, audits for costs incurred or work performed after 2000 remain ongoing and, for much of the Company's work in recent years, have not yet commenced. In addition, non-audit reviews by the government may still be conducted on all the Company's government contracts. An audit of the Company's work, including an audit of work performed by companies the Company has acquired or may acquire, could result in a substantial adjustment to the Company's revenues because any costs found to be improperly allocated to a specific contract will not be reimbursed, and revenues the Company has already recognized may need to be refunded. If a government audit uncovers improper or illegal activities, the Company may be subject to civil and criminal penalties and administrative sanctions, including termination of contracts, forfeiture of profits, suspension of payments, fines and suspension or debarment from doing business with federal government agencies. In addition, the Company could suffer serious harm to its reputation if allegations of impropriety were made against it.

The Company may be liable for systems and service failures.

The Company creates, implements and maintains information technology and technical services solutions that are often critical to its customers' operations, including those of federal, state and local governments. The Company has experienced and may in the future experience some systems and service failures, schedule or delivery delays and other problems in connection with its work. If the Company's solutions, services, products or other applications have significant defects or errors, are subject to delivery delays or fail to meet the Company's customers' expectations, the Company may:

- Lose revenues due to adverse customer reaction;
- Be required to provide additional services to a customer at no charge;
- Receive negative publicity, which could damage the Company's reputation and adversely affect its ability to attract or retain customers; or
- Suffer claims for substantial damages against the Company.

In addition to any costs resulting from product warranties, contract performance or required corrective action, these failures may result in increased costs or loss of revenues if they result in customers postponing subsequently scheduled work or canceling or failing to renew contracts.

While many of the Company's contracts with the federal government limit the Company's liability for damages that may arise from negligence in rendering services to the Company's customers, the Company cannot be sure that these contractual provisions will protect it from liability for damages if it is sued. Furthermore, the Company's errors and omissions and product liability

insurance coverage may not continue to be available on reasonable terms or in sufficient amounts to cover one or more large claims, or the insurer may disclaim coverage as to some types of future claims. The successful assertion of any large claim against the Company could seriously harm the Company's business. Even if not successful, these claims could result in significant legal and other costs and may be a distraction to the Company's management. In certain new business areas, including in the area of homeland security, the Company may not be able to obtain sufficient indemnification or insurance and may decide not to accept or solicit business in these areas.

Security breaches in classified government systems could adversely affect the Company's business.

Many of the programs the Company supports and systems it develops, installs and maintains involve managing and protecting information involved in intelligence, national security and other classified government functions. A security breach in one of these systems could cause serious harm to the Company's business, damage its reputation and prevent the Company from being eligible for further work on critical classified systems for federal government customers. Losses that the Company could incur from such a security breach could exceed the policy limits that it has for errors and omissions or product liability insurance.

The Company's quarterly operating results may vary widely.

The Company's quarterly revenues and operating results may fluctuate significantly in the future. A number of factors cause the Company's revenues, cash flow and operating results to vary from quarter to quarter, including:

- Fluctuations in revenues earned on fixed-price contracts and contracts with a performance-based fee structure;
- Commencement, completion or termination of contracts during any particular quarter;
- Variable purchasing patterns under government GSA schedule contracts, blanket purchase agreements and indefinite delivery, indefinite quantity contracts;
- Changes in Presidential administrations and senior federal government officials that affect the timing of technology procurement;
- Changes in policy or budgetary measures that adversely affect government contracts in general;
- Acquisitions of other technology service providers; and
- Increased purchase requests from customers for equipment and materials in connection with the federal government's fiscal year end, which may affect the Company's fourth quarter operating results.

Changes in the volume of services provided under existing contracts and the number of contracts commenced, completed or terminated during any quarter may cause significant variations in the Company's cash flow from operations because a relatively large amount of the Company's expenses are fixed. The Company incurs significant operating expenses during the start-up and early stages of large contracts and typically does not receive corresponding payments in that same quarter. The Company may also incur significant or unanticipated expenses when contracts expire or are terminated or are not renewed. In addition, payments due to the Company from government agencies may be delayed due to billing cycles or as a result of failures of governmental budgets to gain Congressional and Administration approval in a timely manner.

The Company's senior management and advisory board are important to its customer relationships.

The Company believes that its success depends in part on the continued contributions of its co-founder, Chairman of the Board of Directors, Chief Executive Officer and President, George J. Pedersen, its Executive Vice President, Chief Financial Officer, Treasurer and Director, John A. Moore, Jr., and other members of its senior management and advisory board. The Company relies on its executive officers and senior management to generate business and execute programs successfully. In addition, the relationships and reputation that members of the Company's management team and advisory board have established and maintain with government and military personnel contribute to the Company's ability to maintain good customer relations and to identify new business opportunities. While the Company has employment agreements with some of its executive officers, these agreements do not prevent them from terminating their employment. The loss of Mr. Pedersen, Mr. Moore or any other senior management or advisory board member could impair the Company's ability to identify and secure new contracts and otherwise to manage the Company's business.

The Company must recruit and retain skilled employees to succeed in its labor-intensive business.

The Company believes that an integral part of its success is its ability to provide employees who have advanced information technology and technical services skills and who work well with the Company's customers in a government or defense-related environment. These employees are in great demand and are likely to remain a limited resource in the foreseeable future. If the Company is unable to recruit and retain a sufficient number of these employees, its ability to maintain and grow its business could be negatively impacted. In addition, some of the Company's contracts contain provisions requiring it to commit to staff a program with certain personnel the customer considers key to the Company's successful performance under the contract. In the event the

Company is unable to provide these key personnel or acceptable substitutions, the customer may terminate the contract, and the Company may not be able to recover its costs in the event the contract is terminated.

The Company's business is dependent upon obtaining and maintaining required security clearances.

Many of the Company's federal government contracts require its employees to maintain various levels of security clearances, and the Company is required to maintain certain facility security clearances complying with Department of Defense requirements. Obtaining and maintaining security clearances for employees involves a lengthy process, and it is difficult to identify, recruit and retain employees who already hold security clearances. If the Company's employees are unable to obtain or retain security clearances or if the Company's employees who hold security clearances terminate employment with the Company, the customer whose work requires cleared employees could terminate the contract or decide not to renew it upon its expiration. In addition, the Company expects that many of the contracts on which it will bid will require the Company to demonstrate its ability to obtain facility security clearances and perform work with employees who hold specified types of security clearances. To the extent the Company is not able to obtain facility security clearances or engage employees with the required security clearances for a particular contract, it may not be able to bid on or win new contracts, or effectively rebid on expiring contracts.

If the Company is unable to manage its growth, its business could be adversely affected.

Sustaining the Company's growth has placed significant demands on its management, as well as on its administrative, operational and financial resources. For the Company to continue to manage its growth, it must continue to improve its operational, financial and management information systems and expand, motivate and manage its workforce. If it is unable to successfully manage its growth without compromising its quality of service and its profit margins, or if new systems that the Company implements to assist in managing its growth does not produce the expected benefits, the Company's business, prospects, financial condition or operating results could be adversely affected.

The Company may undertake acquisitions that could increase its costs or liabilities or be disruptive.

One of the Company's key operating strategies is to selectively pursue acquisitions. The Company has made a number of acquisitions in the past, currently is pursuing a number of potential acquisition opportunities, and will consider other acquisitions in the future. The Company may not be able to consummate the acquisitions it currently is pursuing on favorable terms or at all. The Company may not be able to locate other suitable acquisition candidates at prices it considers appropriate or finance acquisitions on terms that are satisfactory to the Company. If the Company does identify an appropriate acquisition candidate, it may not be able to successfully negotiate the terms of an acquisition, finance the acquisition or, if the acquisition occurs, integrate the acquired business into its existing business. Negotiations of potential acquisitions and the integration of acquired business operations could disrupt the Company's business by diverting management away from day-to-day operations. The proceeds the Company receives from its public offerings may not be sufficient to fund the full cost of acquisitions that it may determine to pursue. Acquisitions of businesses or other material operations may require additional debt or equity financing, resulting in additional leverage or dilution of ownership. The difficulties of integration may be increased by the necessity of coordinating geographically dispersed organizations, integrating personnel with disparate business backgrounds and combining different corporate cultures. The Company also may not realize cost efficiencies or synergies that it anticipated when selecting its acquisition candidates. In addition, the Company may need to record write-downs from future impairments of intangible assets, which could reduce its future reported earnings. At times, acquisition candidates may have liabilities or adverse operating issues that the Company fails to discover through due diligence prior to the acquisition.

The Company may be exposed to liabilities or losses from operations that it has discontinued.

In September 2001, the Company decided to dispose of five of its businesses, either by selling them or by winding down their operations. For more information on these discontinued operations, please see "Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations: Discontinued Operations" and note 15 to the Company's consolidated financial statements. The Company's consolidated financial statements reflect, under the heading "Discontinued Operations", the Company's estimate of the net losses it expected from these operations through the date it estimated they would be disposed, and all losses expected to be realized upon the disposal of these operations.

Subsequent to the disposal of these businesses, the Company may continue to be exposed to some liabilities arising from their prior operations. For example, the Company is involved in a lawsuit alleging that it caused or contributed to soil and groundwater contamination. For more information on this lawsuit, see "Item 3—Legal Proceedings." The operations from this subsidiary, the Company's former environmental consulting and remediation business, particularly the performance of environmental consulting and remediation services, may not have been or in the future may not be conducted in compliance with environmental laws, exposing the Company to further liability and damages for the costs of investigating and cleaning up sites of spills, disposals or other releases of hazardous materials. The Company cannot assure you that its liability in these matters, or any other

environmental liabilities that arise in the future, will not exceed its resources or will be covered by insurance. Even though the Company has disposed of this and the other four discontinued operations, it likely will remain liable for any costs, damages or other liabilities imposed upon them that result from or relate to their operations prior to the disposition.

The Company may be affected by intellectual property infringement claims.

The Company's business operations rely extensively on procuring and deploying intellectual property. The Company's employees develop some of the software solutions and other forms of intellectual property that the Company uses to provide information technology solutions to its customers, but it also licenses technology from primary vendors. Typically, under federal government contracts, the Company's government customers may claim rights in the intellectual property the Company develops, making it impossible for the Company to prevent their future use of the Company's intellectual property. The Company is and may in the future be subject to claims from its employees or third parties who assert that software solutions and other forms of intellectual property that the Company used in delivering services and solutions to the Company's customers infringe upon intellectual property rights of such employees or third parties. If the Company's vendors, the Company's employees or third parties assert claims that the Company or the Company's customers are infringing on their intellectual property, the Company could incur substantial costs to defend these claims. In addition, if any of these infringement claims are ultimately successful, the Company could be required to:

- Cease selling or using products or services that incorporate the challenged software or technology;
- Obtain a license or additional licenses; or
- Redesign the Company's products and services that rely on the challenged software or technology.

Covenants in the Company's credit facility may restrict the Company's financial and operating flexibility.

The Company's credit facility contains covenants that limit or restrict, among other things, the Company's ability to borrow money outside of the amounts committed under the credit facility, make investments in certain of its subsidiaries that are borrowers under the credit facility and designated as discontinued operations or in other entities not listed as borrowers under the credit facility, make other restricted payments, pay dividends on the Company's common stock, sell or otherwise dispose of assets other than in the ordinary course of business, merge or consolidate, or make acquisitions, in each case without the prior written consent of the Company's lenders. The Company's credit facility also requires the Company to maintain specified financial covenants relating to fixed charge coverage, interest coverage, debt coverage, and minimum consolidated net worth. The Company's ability to satisfy these financial ratios can be affected by events beyond its control, and the Company cannot assure you that it will meet these ratios. For example, on two occasions in the past five years, in March 2001 and in November 2000, the Company obtained waivers for failure to maintain the required fixed charge coverage ratio as of the end of the preceding quarters under the credit facility that was in effect at that time. Default under the Company's credit facility could allow the lenders to declare all amounts outstanding to be immediately due and payable. The Company has pledged substantially all of its assets, including the stock of certain of the Company's subsidiaries, to secure the debt under the Company's credit facility. If the lenders declare amounts outstanding under the credit facility to be due, the lenders could proceed against those assets. Any event of default, therefore, could have a material adverse effect on the Company's business if the creditors determine to exercise their rights. The Company also may incur future debt obligations that might subject the Company to restrictive covenants that could affect its financial and operational flexibility, restrict the Company's ability to pay dividends on its common stock or subject the Company to other events of default. Any such restrictive covenants in any future debt obligations the Company incurs could limit the Company's ability to fund its businesses with equity investments or intercompany advances, which would impede the Company's ability to operate or expand its business.

From time to time the Company may require consents or waivers from its lenders to permit actions that are prohibited by its credit facility. If in the future the Company's lenders refuse to provide waivers of the Company's credit facility's restrictive covenants and/or financial ratios, then the Company may be in default under its credit facility, and the Company may be prohibited from undertaking actions that are necessary or desirable to maintain and expand its business.

The Company's employees or subcontractors may engage in misconduct or other improper activities.

The Company is exposed to the risk that employee fraud or other misconduct could occur. In addition, from time to time the Company enters into arrangements with subcontractors and joint venture partners to bid on and execute particular contracts or programs and it is exposed to the risk that fraud or other misconduct or improper activities by such persons may occur. Misconduct by employees, subcontractors or joint venture partners could include intentional failures to comply with federal laws, federal government procurement regulations or the terms of contracts that the Company receives and failing to disclose unauthorized or unsuccessful activities to the Company, which could lead to civil, criminal, and/or administrative penalties (including fines, imprisonment, suspension and/or debarment from performing federal government contracts) and reputational harm. Misconduct by the Company's employees, subcontractors or joint venture partners could also involve the improper

collection, handling or use of the Company's customers' sensitive or classified information, which could result in regulatory sanctions and serious harm to the Company's reputation. The Company has from time to time experienced occurrences of misconduct and improper activities by its employees, subcontractors or joint venture partners. It is not always possible to deter misconduct by the Company's employees, subcontractors or joint venture partners. Under certain circumstances, conduct of the Company's employees can be imputed to the ManTech subsidiary for which they work and the conduct of ManTech subsidiaries can be imputed to ManTech International Corporation with the consequence that ManTech International Corporation could be subject to sanctions and penalties for actions taken by its subsidiaries and/or the employees of its subsidiaries. The precautions the Company takes to prevent and detect such activity may not be effective in controlling unknown or unmanaged risks or losses and such misconduct by employees, subcontractors or joint venture partners could result in serious civil or criminal penalties or sanctions or reputational harm to the Company.

ITEM 2. PROPERTIES

All of the Company's facilities are leased in close proximity to its customers. Since 1992, the Company has leased its corporate headquarters office building in Fairfax, Virginia. The Company is in the sixth year of a ten-year lease on this facility. As of December 31, 2002, the Company leased 19 additional operating facilities throughout the metropolitan Washington, D.C. area and 56 facilities in other parts of the United States. The Company also has employees working at customer sites throughout the United States and in other countries.

ITEM 3. LEGAL PROCEEDINGS

On June 1, 2001, CHBP, Ltd., a customer of ManTech Environmental Corporation, the Company's former environmental consulting and remediation business, filed suit in the 333rd District Court of Harris County Texas against a number of parties alleging initially a total of \$2.0 million in damages, now increased to a total of \$10.0 million as set forth in the most recent pleadings, from soil and groundwater contamination caused by the defendants while occupying a commercial business center owned by CHBP, Ltd. On November 15, 2001, some of the defendants in this suit filed a third-party complaint against ManTech Environmental Corporation, alleging that services provided by the Company's subsidiary to CHBP, Ltd. caused or contributed to the alleged contamination of the property. On April 30, 2002, CHBP, Ltd. amended their suit to assert a direct claim against ManTech Environmental Corporation. The Company has denied the allegations. A trial date is set for January 19, 2004. The Company believes that it has other defenses and professional liability insurance coverage, and does not believe this litigation will have a material adverse effect on its business, prospects, financial condition or operating results. The Company decided to discontinue the operation of the commercial business performed by ManTech Environmental Corporation. For more information, please see "Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations: Discontinued Operations" and note 15 to the Company's consolidated financial statements.

Like most large government defense contractors, the Company's contract costs are audited and reviewed on a continual basis by an in-house staff of auditors from the Defense Contract Auditing Agency. In addition to these routine audits, the Company is subject from time to time to audits and investigations by other agencies of the federal government. These audits and investigations are conducted to determine if the Company's performance and administration of its government contracts are compliant with contractual requirements and applicable federal statutes and regulations. An audit or investigation may result in a finding that the Company's performance and administration is compliant or, alternatively, may result in the government initiating proceedings against the Company or its employees, including administrative proceedings seeking repayment of monies, suspension and/or debarment from doing business with the federal government or a particular agency, or civil or criminal proceedings seeking penalties and/or fines. Audits and investigations conducted by the federal government frequently span several years. Set forth below is a description of certain government audits and investigations to which the Company is subject, in addition to routine audits of the Company's contract costs.

On August 17, 2001, the Company was served with a grand jury subpoena issued by the United States District Court for the Eastern District of Virginia. The U.S. Attorney's Office for the Eastern District of Virginia has advised the Company that the investigation relates to whether the Company improperly charged a portion of its corporate merger and acquisition-related expenses and certain expenses of its Australian-based software consulting subsidiary (which is one of the Company's businesses included in discontinued operations) in a manner that would have resulted in those expenses being reimbursed by the U.S. government. As anticipated, the Company received a second grand jury subpoena seeking documents relating to this investigation on August 2, 2002. Based on the facts known to the Company as of the date of this annual report, the Company does not expect the consequences of this investigation to have a material adverse effect on its business, prospects, financial condition or operating results. However, this investigation is still on-going and it is not possible to tell how it may develop in the future. The Company is fully cooperating with the federal government's investigation of this matter.

On October 9, 2002, the Company received a document subpoena issued by the Department of Defense Office of Inspector General. The subpoena seeks the production of certain documents concerning a Department of Defense contract pursuant to

which one of the Company's subsidiaries, ManTech Solutions & Technologies Corporation ("MSTC"), performed personnel security clearance background checks for the Defense Security Service. Although the Company did not handle classified information under this contract, the terms of the contract required MSTC to utilize personnel with appropriate security clearances. The Company believes that the investigation relates, in part, to whether it improperly charged certain costs under the contract, as well as to the propriety of the security clearances and credentials of certain subcontractors and employees who provided services under the contract. After receiving this subpoena, the Company's outside counsel and the Company's chief compliance officer began an investigation of MSTC regarding certain matters relevant to the subpoena. In the course of the Company's internal investigation, which remains in process, the Company discovered that up to five weekly time sheets of one person who performed services under the contract and who did not possess the proper security clearance had been manually changed after receipt of the subpoena and before they were produced to the Department of Defense Office of Inspector General to indicate that such person did not directly charge time to the contract. None of the changed information was entered into the Company's official accounting records, and, therefore, the information in the Company's accounting system was not compromised. The Company promptly informed the government of this development, and it terminated certain employees of MSTC following its discovery relating to the changed time sheets. The Company notes that this development may result in proceedings against certain current and/or former employees of MSTC and possibly MSTC itself. Based on the facts known to the Company, the Company does not expect the consequences of the government's investigation to have a material adverse effect on its business, prospects, financial condition or operating results. However, this investigation is at a preliminary stage and it is not possible to tell how it may develop in the future. For additional information regarding the penalties to which the Company could be subject in the event the government's investigation results in a determination that the Company or its employees or agents acted improperly, see "Item 1—Business: Risks Related to the Company's Business," the sections entitled "the Company's employees or subcontractors may engage in misconduct or other improper activities" and "the Company must comply with complex procurement laws and regulations" and "the Company's contracts are subject to audits and cost adjustments by the federal government".

The Company also is currently subject to an investigation by the Inspector General of the EPA originating from a subpoena received in March of 2000 regarding the number of hours the Company charged in the performance of a contract with the EPA. The Company does not believe that the outcome of this investigation will have a material adverse effect on its business, prospects, financial condition or operating results. The Company is fully cooperating with the federal government's investigation of this matter.

In addition to the foregoing, the Company is subject to certain other legal proceedings, investigations, claims and disputes that arise in the ordinary course of its business. Although the Company cannot predict the outcomes of these other legal proceedings, investigations, claims and disputes, based on the information now available to it, the Company does not believe that the ultimate resolution of these matters, either individually or in the aggregate, will have a material adverse effect on its business, prospects, financial condition or operating results.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS

No matters were submitted to a vote of security holders during the fourth quarter of the year ended December 31, 2002.

PART II

ITEM 5. MARKET FOR THE REGISTRANT'S COMMON STOCK AND RELATED STOCKHOLDER MATTERS

Market Information

The Company's Class A common stock has been quoted on the Nasdaq National Market under the symbol "MANT" since the Company's initial public offering on February 7, 2002. The following table sets forth, for the periods indicated, the high and low prices of the Company's shares of common stock, as reported on the Nasdaq National Market.

| | High | Low |
|---|----------|----------|
| First Quarter 2002 (beginning February 7, 2002) | \$ 20.46 | \$ 17.10 |
| Second Quarter 2002 | 24.71 | 18.75 |
| Third Quarter 2002 | 25.79 | 16.27 |
| Fourth Quarter 2002 | 25.50 | 16.42 |

There were nine holders of record of the Company's Class A common stock and five holders of record of the Company's Class B common stock. The number of holders of record of the Company's Class A common stock is not representative of the number of beneficial holders due to the fact that many shares are held by depositories, brokers or nominees.

Dividend Policy

The Company's credit facility prohibits it from paying cash dividends to holders of its common stock. In addition, the Company currently intends to retain any earnings for the future operation and growth of its business. Therefore, the Company does not anticipate paying any cash dividends on its common stock in the foreseeable future. No dividends have been declared on any class of the Company's common stock during the past two fiscal years. Any future dividends declared would be at the discretion of the Company's board of directors and would depend, among other factors, upon the Company's results of operations, financial condition and cash requirements and the terms of the Company's credit facility and other financing agreements at the time such payment is considered.

Use of Proceeds

The Company completed its initial public offering of Class A Common Stock in February, 2002, pursuant to Form S-1 (File Nos. 333-73946 and 333-82310) under the Securities Act of 1933. Under these registration statements, the Company registered a total of 7,200,000 shares of its Class A common stock, of which 6,866,667 shares were sold by the Company, and 333,333 shares were sold by the selling stockholder, George J. Pedersen, who is the Company's Chairman of the Board of Directors, Chief Executive Officer and President, and a 10% or greater stockholder. All such shares were sold at \$16.00 per share on February 7, 2002. The managing underwriters for the offering were Jefferies & Company, Inc., Legg Mason Wood Walker, Incorporated and BB&T Capital Markets. Pursuant to the terms of the underwriting agreement described in the registration statements, the underwriters were entitled to elect, not later than March 9, 2002, to sell up to 1,080,000 additional shares of the Company's Class A common stock, of which 696,487 shares were to be sold by the Company, and 383,513 shares were to be sold by the selling stockholder if the underwriters elected to sell all the additional shares. On February 12, 2002, the underwriters elected to sell an additional 1,080,000 shares, resulting in an aggregate offering price of \$132,480,000, of which \$121,010,464 pertained to shares sold by the Company and the remaining \$11,469,536 pertained to shares sold by the selling stockholder. The total underwriting discount was approximately \$9.3 million, of which the company paid \$8.5 million, and the Company incurred other expenses (including filing, legal and accounting fees) of approximately \$2.3 million, none of which were paid to the Company's directors or officers or their affiliates or to persons owning 10% or more of any class of the Company's common stock or that of the Company's affiliates.

In December 2002, the Company completed a follow-on public offering of its Class A Common Stock pursuant to Form S-1 (File No. 333-101226). Under this registration statement, the Company registered a total of 6,150,000 shares of its Class A common stock, of which 4,500,000 shares were sold by the Company, and 1,650,000 shares were sold by selling stockholders. The selling stockholders were two individuals, George J. Pedersen who is the Company's Chairman of the Board of Directors, Chief Executive Officer and President, and a 10% or greater stockholder, and John A. Moore, Jr. who is the Company's Director, Executive Vice President, Chief Financial Officer and Treasurer. All such shares were sold at \$18.00 per share on December 17, 2002. The managing underwriters for the offering were Jefferies/Quarterdeck, LLC, Legg Mason Wood Walker, Incorporated, U.S. Bancorp Piper Jaffray, Adams, Harkness & Hill, Inc., and BB&T Capital Markets. Pursuant to the terms of the underwriting agreement described in the registration statements, the underwriters were entitled to elect, not later than January 16, 2003, to sell up to 922,500 additional shares of the Company's Class A common stock, of which 876,500 shares were to be sold by the Company, and 46,000 shares were to be sold by one of the selling stockholders, Mr. Moore, if the underwriters elected to sell all

the additional shares. On December 30, 2002, the underwriters elected to sell an additional 922,500 shares, resulting in an aggregate offering price of \$127,305,000, of which \$96,777,000 pertained to shares sold by the Company and the remaining \$30,528,000 pertained to shares sold by Messrs. Pedersen and Moore. The total underwriting discount was approximately \$6.3 million, of which the company paid \$4.8 million, and the Company incurred other expenses (including filing, legal and accounting fees) of approximately \$1.0 million, none of which were paid to the Company's directors or officers or their affiliates or to persons owning 10% or more of any class of the Company's common stock or that of the Company's affiliates.

The Company's net proceeds from the initial and follow-on public offerings were approximately \$110.2 million and \$90.9 million, respectively. Proceeds from the offerings were used to repay the principal and accrued interest outstanding under the Company's term loan and under its subordinated debt, to pay off all but \$25.0 million of principal owing under the Company's revolving credit facility, to purchase Aegis Research Corporation on August 5, 2002 for \$69.4 million, to purchase CTX Corporation on December 11, 2002 for \$35.8 million, to purchase Integrated Data Systems on February 28, 2003 for \$62.7 million, and to purchase MSM Security Services, Inc. on March 1, 2003 for \$4.6 million. The principal and accrued interest under the Company's term loan was \$6.0 million, principal and accrued interest under the Company's subordinated debt was \$8.1 million, and the principal repayment under the Company's revolving credit facility was \$17.7 million.

Securities Authorized for Issuance under Equity Compensation Plans

The following table provides information as of December 31, 2002 regarding compensation plans (including individual compensation arrangements) under which the Company's equity securities are authorized for issuance.

| Plan category | (a) | (b) | (c) |
|--|---|---|---|
| | Number of securities to be issued upon exercise of outstanding options, warrants and rights | Weighted-average exercise price of outstanding options, warrants and rights | Number of securities remaining available for future issuance under equity compensation plans (excluding securities reflected in column (a)) |
| Equity compensation plans approved by security holders | 1,118,000 | \$ 17.01 | 1,722,379 |
| Equity compensation plans not approved by security holders | — | — | — |
| Total | 1,118,000 | \$ 17.01 | 1,722,379 |

ITEM 6. SELECTED FINANCIAL DATA

The selected financial data presented below for each of the years in the five-year period ended December 31, 2002 is derived from the Company's audited consolidated financial statements. You should read the selected financial data presented below in conjunction with the Company's consolidated financial statements, the notes to the Company's consolidated financial statements and "Item 7—Management's Discussion and Analysis of Financial Condition and Results of Operations."

| | Year Ended December 31, | | | | |
|--|--|-----------|-----------|-----------|-----------|
| | 2002 | 2001 | 2000 | 1999 | 1998 |
| | (In thousands, except per share amounts) | | | | |
| Revenues | \$500,219 | \$431,436 | \$378,827 | \$353,924 | \$314,309 |
| Cost of services | 407,316 | 353,337 | 315,414 | 296,306 | 265,189 |
| Gross profit | 92,903 | 78,099 | 63,413 | 57,618 | 49,120 |

| Basic earnings per share from continuing operations(1) | \$ 0.89 | \$ 0.87 | \$ 0.39 | \$ 0.37 | \$ 0.15 |
| Diluted earnings per share from continuing operations(1) | \$ 0.88 | \$ 0.87 | \$ 0.38 | \$ 0.36 | \$ 0.15 |
| Balance Sheet Data: | | | | | |
| Cash and cash equivalents | \$ 81,096 | \$ 26,902 | \$ 29,578 | \$ 19,571 | \$ 14,572 |
| Working capital | 152,700 | 67,622 | 71,882 | 66,784 | 59,354 |
| Total assets | 364,388 | 186,242 | 186,843 | 186,070 | 165,718 |
| Long-term debt | 25,000 | 70,343 | 73,000 | 72,005 | 66,377 |
| Total stockholders' equity | 245,998 | 22,557 | 21,794 | 19,548 | 15,515 |

(1) In January 2002, prior to the Company's initial public offering, the Company reincorporated from New Jersey to Delaware, recapitalized and effected a 16.3062-for-one stock split. All per share data gives effect to these transactions. The holders of each share of Class A common stock are entitled to one vote per share, and the holders of each share of Class B common stock are entitled to ten votes per share.

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following discussion of the Company's financial condition and results of operations should be read together with the consolidated financial statements and the notes to those statements included elsewhere in this document. This discussion contains forward-looking statements that involve risks and uncertainties. This discussion addresses only the Company's continuing operations, except in the discussion under the heading, "Discontinued Operations." For more information on the Company's discontinued operations, please see note 15 to the Company's consolidated financial statements.

Overview

The Company delivers a broad array of information technology and technical services solutions to U.S. federal government customers, focusing primarily on critical national defense programs for the intelligence community and Department of Defense. The Company designs, develops, procures, implements, operates, tests and maintains mission-critical, enterprise information technology and communication systems and intelligence processing infrastructures for the Company's federal government customers. The Company also provides solutions to federal government civilian agencies, as well as to state and local governments and commercial customers. Many of the Company's 4,436 employees have military or intelligence experience and high level security clearances that allows the Company to work with its customers in highly classified environments and at front-line deployments in the United States and 34 countries globally.

A substantial portion of the Company's revenues are derived from contracts with the federal government. For the years ended December 31, 2002 and 2001, 96.3% and 96.2%, respectively, of the Company's revenues were derived, either as a prime or a subcontractor, from contracts with the federal government. For the years ended December 31, 2002 and 2001, the Company derived 86.7% and 85.1%, respectively, of the Company's revenues from contracts with its customers in the intelligence community and Department of Defense.

The Company's revenues consist primarily of payments for the work of the Company's employees and, to a lesser extent, the pass-through of costs for material and subcontract efforts under contracts with the Company's customers. The Company enters into three types of federal government contracts: cost-plus, time-and-materials and fixed-price. Under cost-plus contracts, the Company is reimbursed for allowable costs and paid a fee, which may be fixed or performance-based. Under time-and-materials contracts, the Company is reimbursed for labor at negotiated hourly billing rates and for certain expenses. The Company assumes financial risk on time-and-material contracts because the Company assumes the risk of performing those contracts at negotiated hourly rates. Under fixed-price contracts, the Company performs specific tasks for a fixed price. Compared to cost-plus contracts, fixed-price contracts generally offer higher margin opportunities but involve greater financial risk because the Company bears the impact of cost overruns and receives the benefit of cost savings. For the year ended December 31, 2002, the Company derived approximately 38.5%, 45.1% and 16.4% of the Company's revenues from cost-plus, time-and-materials and fixed-price contracts, respectively. For the year ended December 31, 2001, the Company derived approximately 35.2%, 36.2% and 28.6% of the Company's revenues from cost-plus, time-and-materials and fixed-price contracts, respectively.

The Company recognizes revenues under cost-plus contracts as its costs are incurred and the Company includes an estimate of applicable fees earned. The Company recognizes revenues under time-and-materials contracts by multiplying the number of direct labor-hours expended in the performance of the contract by the contract billing rates and adding other billable direct costs. For contracts that include performance-based incentives, the Company recognizes the incentives when they have been earned and the Company can reasonably demonstrate satisfaction of the performance goal or when the incentive has been awarded. The Company recognizes revenues under fixed-price contracts using the percentage of completion method, which involves a periodic assessment of costs incurred to date in relation to the estimated total costs at completion, or upon the delivery of specific products or services. The Company records the cumulative effects of any revisions to the Company's estimated total costs and revenues in the period in which the facts requiring revisions become known. If the Company anticipates a loss on a contract, the Company provides for the full amount of the anticipated loss at the time of that determination.

The Company's most significant expense is the Company's cost of services, which consists primarily of direct labor costs for program personnel and direct expenses incurred to complete contracts, including cost of materials and subcontract efforts. The Company's ability to accurately predict personnel requirements, salaries and other costs, as well as to manage personnel levels and successfully redeploy personnel, can have a significant impact on the Company's cost of services. General and administrative expenses consist primarily of costs associated with the Company's management, finance and administrative groups; personnel training; sales and marketing expenses, which include bid and proposal efforts; and certain occupancy, travel and other corporate costs.

Results of Operations

The following table sets forth, for each period indicated, the percentage of items in the consolidated statement of operations in relation to revenues.

| | Year Ended December 31, | | |
|--|-------------------------|--------|--------|
| | 2002 | 2001 | 2000 |
| Revenues | 100.0% | 100.0% | 100.0% |
| Cost of services | 81.4 | 81.9 | 83.3 |
| Gross profit | 18.6 | 18.1 | 16.7 |
| Costs and expenses: | | | |
| General and administrative | 10.4 | 10.4 | 11.0 |
| Depreciation and amortization | 0.5 | 0.7 | 0.9 |
| Total costs and expenses | 10.9 | 11.1 | 11.9 |
| Income from operations | 7.7 | 7.0 | 4.8 |
| Interest expense | 0.1 | 0.7 | 1.2 |
| Other (income) expense, net | (0.1) | (0.3) | 0.3 |
| Income before provision for income taxes and minority interest | 7.7 | 6.6 | 3.3 |
| Provision for income taxes | (3.1) | (2.8) | (1.6) |
| Minority interest | (0.0) | (0.0) | (0.0) |
| Income from continuing operations | 4.6 | 3.8 | 1.7 |
| Loss from discontinued operations | — | (1.5) | (1.2) |
| Loss on disposal of discontinued operations | (0.8) | (2.1) | (0.2) |
| Net income | 3.8% | 0.2% | 0.3% |

The following table sets forth, for each period indicated, the percentage of the Company's revenues derived from each of the Company's major types of customers.

| | Year Ended December 31, | | |
|--------------------------------------|-------------------------|--------|--------|
| | 2002 | 2001 | 2000 |
| Intelligence / Department of Defense | 86.6% | 85.1% | 83.6% |
| Federal Civilian Agencies | 9.7 | 11.1 | 12.5 |
| Commercial / State / Local | 3.7 | 3.8 | 3.9 |
| Total | 100.0% | 100.0% | 100.0% |

Year Ended December 31, 2002 Compared to the Year Ended December 31, 2001

Revenues. Revenues increased 15.9% to \$500.2 million for the year ended December 31, 2002, compared to \$431.4 million for 2001. This increase is primarily attributable to additional work under contracts that were in existence during the prior year, and the new U.S. Army Communications-Electronics Command (CECOM) contract. Additional work from the Department of State and the Army for secure systems and infrastructure solutions contributed to the increased revenues. Additionally, the Company's acquisition of Aegis Research Corporation contributed \$23.7 million to the increased revenues. The Company derived approximately 39.8% of its revenues for the year ended December 31, 2002 from work under GSA schedule contracts, compared with approximately 32.6% for 2001. The Company derived approximately 9.2% of its revenues for 2002 from contracts in which it acted as a subcontractor, compared with approximately 8.1% for 2001.

Cost of services. Cost of services increased 15.3% to \$407.3 million for the year ended December 31, 2002, compared to \$353.3 million for 2001. As a percentage of revenues, cost of services decreased from 81.9% to 81.4%. Direct labor costs increased by 26.8%, while other direct costs of material and subcontracts increased by 4.3% over 2001. Material and subcontract costs increased to \$158.2 million for the year ended December 31, 2002, compared to \$151.7 million for 2001. The increase in material and subcontract costs is primarily a result of increased secure systems and infrastructure solutions contract work.

Gross profit. Gross profit increased 19.0% to \$92.9 million for the year ended December 31, 2002, compared to \$78.1 million for 2001. Gross profit margin increased to 18.6% for the year ended December 31, 2002, compared to 18.1% for 2001. This increase resulted from higher margins on new secure systems and infrastructure solutions and information technology tasks, in conjunction with the Company's improved realization of cost efficiencies, as a greater percentage of the Company's work is performed under GSA schedule contracts.

General and administrative. General and administrative expenses increased 15.7% to \$51.8 million for the year ended December 31, 2002, compared to \$44.8 million for 2001 due to additional management personnel and infrastructure to support the growth of the Company's business. As a percentage of revenues, general and administrative expenses for the year ended December 31, 2002 were 10.4%, which is consistent with the prior year.

Depreciation and amortization. Depreciation and amortization expense has decreased 22.4% to \$2.5 million for the year ended December 31, 2002 compared to \$3.3 million in 2001. While depreciation expense has increased by \$0.1 million, amortization decreased by \$1.1 million as a result of the Company's adoption of SFAS No. 142, which discontinues the amortization of acquired goodwill.

Income from operations. Income from operations increased 28.3% to \$38.5 million for the year ended December 31, 2002, compared with \$30.1 million for 2001. The increase was primarily a result of the increase in revenues relative to the cost of services discussed above.

Income from continuing operations. Income increased 40.6% to \$22.8 million for the year ended December 31, 2002, compared to \$16.2 million for 2001. The increase resulted from higher operating income, reduced interest expense and a lower effective tax rate. Comparative net interest expense decreased by 77.9% for the year ended December 31, 2002 as a result of debt reduction and investment of the proceeds of the Company's initial and follow-on public offerings. The Company's effective tax rate for the year ended December 31, 2002 was 40.7%, compared to 42.7% for 2001, due primarily to the elimination of non-deductible goodwill amortization in current earnings.

Year Ended December 31, 2001 Compared to the Year Ended December 31, 2000

Revenues. Revenues increased 13.9% to \$431.4 million for the year ended December 31, 2001, compared to \$378.8 million for 2000. This increase is attributable primarily to additional work under contracts that were in existence during the prior year. Additional work from the Department of State and the Army for secure systems and infrastructure solutions, the Defense Security Service for information technology solutions and from the Marine Corps for systems engineering solutions contributed significantly to the increased revenues. The Company derived approximately 32.6% of the Company's revenues for the year ended December 31, 2001 from work under GSA schedule contracts, compared with approximately 29.8% for 2000. The Company derived approximately 8.1% of its revenues for 2001 from contracts in which it acted as a subcontractor, compared with approximately 7.8% for 2000.

Cost of services. Cost of services increased 12.0% to \$353.3 million for the year ended December 31, 2001, compared to \$315.4 million for 2000. As a percentage of revenues, cost of services decreased from 83.3% to 81.9%. Direct labor costs increased by 8.5%, while other direct costs increased by 19.3% over 2000. Material and subcontract costs increased to \$151.7 million for the year ended December 31, 2001, compared to \$127.2 million for 2000. The increase arose primarily from the Company's secure systems and infrastructure solutions work and, to a lesser degree, the Company's Defense Security Service information technology work.

Gross profit. Gross profit increased 23.2% to \$78.1 million for the year ended December 31, 2001, compared to \$63.4 million for 2000. Gross profit margin increased to 18.1% for the year ended December 31, 2001, compared to 16.7% for 2000. The increase resulted from higher margins on new secure systems and infrastructure and information technology tasks, in conjunction with the Company's improved realization of cost efficiencies, as a greater percentage of the Company's work was performed under GSA schedule contracts.

General and administrative. General and administrative expenses increased 7.8% to \$44.8 million for the year ended December 31, 2001, compared to \$41.5 million for 2000 for additional management personnel and infrastructure to support the growth of the Company's business. As a percentage of revenues, general and administrative expenses declined 0.6% over the comparable period.

during the prior year as a result of operating efficiencies, such as the Company's improved monitoring of costs.

Depreciation and amortization. Depreciation and amortization expense remained relatively constant for the years ended December 31, 2001 and 2000, because the Company did not acquire any companies or make any significant purchases of fixed assets during the periods.

Income from operations. Income from operations increased 61.7% to \$30.1 million for the year ended December 31, 2001, compared with \$18.6 million for 2000. The increase was primarily a result of the increase in revenues relative to the cost of services discussed above.

Income from continuing operations. Income increased 127.9% to \$16.2 million for the year ended December 31, 2001, compared to \$7.1 million for 2000. The increase resulted from higher operating income, an increase in other income, reduced interest expense and a lower effective tax rate. Other income increases are primarily attributable to the Company's equity investment in an affiliate which was more profitable in 2001. Interest expense for 2001 decreased by 34.2% from the year ended December 31, 2000 as a result of a \$6.2 million reduction in the Company's average balance under the Company's line of credit and from lower interest rates. The Company's effective tax rate for the year ended December 31, 2001 was 42.7%, compared to 45.6% for 2000, due to a relative decrease in non-deductible expenses.

Liquidity and Capital Resources

The Company's primary source of liquidity is cash provided by operations and the Company's revolving credit and term-loan facility. The Company funds its operations primarily through cash provided by operating activities. Net proceeds of \$201.1 million from the Company's initial and follow-on public offerings also provide a source of liquidity. Cash provided by operating activities of continuing operations was \$7.4 million for the year ended December 31, 2002, a decrease of \$11.6 million from the prior year. The primary reasons for this decrease were increased contract receivables and decreased tax accruals offset by an increase in income from continuing operations and an increase in billings in excess of revenue earned. Cash paid for income taxes for the year ended December 31, 2002 includes \$5.4 million associated with the Company's conversion to an accrual-basis taxpayer.

Cash provided by operating activities of continuing operations for 2002, 2001 and 2000 was \$7.4 million, \$19.0 million and \$19.9 million, respectively. In 2002, cash provided by operating activities was generated primarily from income from continuing operations of \$22.8 million and increases in accounts payable and accruals, offset by an increase in contract receivables and a decrease in deferred income taxes. In 2001, cash provided by operating activities was generated primarily from income from continuing operations of \$16.2 million and increases in accounts payable and accruals, offset by an increase in contract receivables and decreases in billings in excess. In 2000, cash provided by operating activities was generated primarily from income from continuing operations of \$7.1 million, a decrease in contract receivables, an increase in billings in excess and an increase in salary-related accruals, offset by increases in prepaid expenses and other assets and decreases in accounts payable and accrued expenses.

Cash used in investing activities of continuing operations was \$108.2 million for the year ended December 31, 2002, compared to \$5.8 million for the prior year. Investing activities included the acquisitions of Aegis Research Corporation and CTX Corporation for \$69.4 million and \$35.8 million, respectively, purchases of property and equipment of \$2.7 million, and investments in intellectual property of \$1.3 million. Cash used in investing activities for 2001 and 2000 was \$5.8 million and \$4.2 million, respectively. Investing activities have primarily consisted of investments in intellectual property, acquisitions of businesses, investments and loans to affiliates and purchases of property and equipment.

Cash provided by financing activities of continuing operations was \$155.1 million for the year ended December 31, 2002, compared to cash used of \$4.8 million and \$0.0 million for the years ended December 31, 2001 and 2000, respectively. The net cash provided by financing activities during 2002 is primarily the result of the net proceeds of the Company's initial and follow-on public offerings of \$110.2 million and \$90.9 million, respectively, less amounts used to repay debt. The net cash used during 2001 is primarily the result of debt reduction. Debt repayments and borrowings produced no significant cash impact in 2000.

On August 5, 2002, the Company acquired all of the outstanding shares of Aegis Research Corporation for a cash purchase price of approximately \$69.1 million, excluding \$0.3 million of acquisition-related costs. The acquisition has been accounted for using the purchase method of accounting. The purchase price has been allocated to the assets acquired and the liabilities assumed based upon their estimated fair market values. The balance of the purchase price was recorded as goodwill. The acquisition of Aegis Research Corporation also provides a cash tax savings to the Company due to the deductibility of goodwill and related intangibles of approximately \$24.4 million over 15 years. The goodwill is deductible because the shareholders of Aegis Research Corporation made a section 338(h)(10) election under the federal Tax Code. The revenues of Aegis Research Corporation for calendar year 2002 were \$57.1 million, of which \$23.7 million were consolidated into the Company's revenues in calendar year 2002. The Company funded the acquisition using proceeds from the Company's initial public offering.

On December 11, 2002, the Company acquired all of the outstanding shares of CTX Corporation for a cash purchase price of approximately \$35.3 million, excluding \$0.5 million of acquisition-related costs. The acquisition has been accounted for using the

purchase method of accounting. The purchase price has been allocated to the assets acquired and the liabilities assumed based upon their estimated fair market values. The balance of the purchase price was recorded as goodwill. The acquisition of CTX Corporation also provides a cash tax savings to the Company due to the deductibility of goodwill and related intangibles of approximately \$10.5 million over 15 years. The goodwill is deductible because the shareholders of CTX Corporation made a section 338(h)(10) election under the federal Tax Code. The revenues of CTX Corporation for calendar year 2002 were \$35.0 million, of which \$1.6 million were consolidated into the Company's revenues in calendar year 2002. The Company funded the acquisition using proceeds from the Company's initial and follow-on public offerings.

On December 17, 2001, the Company executed a new Business Loan and Security Agreement with Citizens Bank of Pennsylvania, PNC Bank N.A., Branch Banking and Trust Company of Virginia, and Chevy Chase Bank, F.S.B. to refinance and replace a prior loan agreement. The agreement provides for a \$65.0 million revolving credit facility and a \$6.4 million term loan. Under the term-loan portion of the agreement, the principal balance was payable in consecutive quarterly installments of \$0.5 million on the last business day of each quarter commencing with the last business day of December 2001. The maturity date of the agreement is December 31, 2004. Under the agreement, the Company is required to maintain specified financial covenants relating to fixed charge coverage, interest coverage, debt coverage, and to maintain a certain level of consolidated net worth. The agreement also places limitations on additional borrowings, mergers, and related party transactions, issuances of capital stock and payment of dividends, and limitations with respect to capital expenditures. Borrowings under the agreement are collateralized by the Company's eligible contract receivables, inventory, all of the Company's stock in certain of the Company's subsidiaries and certain property and equipment and bear interest at the London Interbank Offered Rate (LIBOR), or the lender's prime rate, plus market-rate spreads that are determined based on a company leverage ratio calculation. The LIBOR spreads may range from 1.00% to 1.75% and the prime rate spreads may range from 0.00% to 0.50%. To manage the Company's exposure to the fluctuations in these variable interest rates, an interest swap was executed in December 2001. The swap agreement has a notional principal amount of \$25.0 million and currently has a fixed LIBOR rate of 6.83%. The term loan balance and accrued interest and all but \$25.0 million of the revolving credit facility were repaid during the first quarter of 2002. At December 31, 2002, the Company had \$25.0 million in borrowings outstanding under the revolving credit facility under the agreement.

In January 1998, the Company executed a seven-year Subordinated Credit Agreement with First Source Financial LLP for \$8.0 million to finance the redemption of the Company's preferred stock. The principal balance was payable in eight consecutive quarterly installments of \$0.9 million on the first business day of each quarter commencing with the first business day of January 2003. A ninth and final payment was due on the last day of December 2004. The balance and accrued interest of this credit facility was repaid during the first quarter of 2002.

The Company believes the capital resources available to it under the Company's credit agreements and cash from the Company's operations are adequate to fund the Company's ongoing operations and to support the internal growth the Company expects to achieve for at least the next 12 months. The Company anticipates financing its external growth from acquisitions as well as the Company's longer-term internal growth through one or a combination of the following: cash from operations; additional borrowing; issuance of equity; use of the existing revolving facility; or a refinancing of the Company's credit facilities.

Discontinued Operations

In September 2001, the Company decided to exit certain lines of business involving foreign operations or operations that primarily serve commercial customers. The Company decided to dispose of the Company's Australia-based software solutions consulting business, the Company's United Kingdom-based bank remittance processing business, the Company's China-based consulting business, the Company's U.S.-based environmental consulting and remediation business and the Company's U.S.-based application-hosting business. The Company is not discontinuing or disposing of the Company's operations that currently provide comprehensive information technology and systems engineering solutions to federal government agencies, including the EPA, or that currently provide database conversion solutions to commercial customers. The lines of business to be disposed of or discontinued have been classified as discontinued operations in the Company's consolidated financial statements and the likely net gains and losses to income expected from these businesses through the estimated date of disposal have been accrued in accordance with Accounting Principles Board Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business and Extraordinary Unusual and Infrequently Occurring Events and Transactions*. The Company has concluded the disposal of all of these businesses as of December 31, 2002, except the Company's Australia-based software solutions business. As of December 31, 2002, the Company reached a definitive agreement regarding the sale of this business, and the transaction closed in February 2003. Additional accruals for losses incurred in connection with the disposal of discontinued operations of \$0.8 million and \$2.9 million were recorded in the second and fourth quarters of 2002, respectively. See "Item 1—Business: Risks Related to the Company's Business," the section entitled, "The Company may be exposed to liabilities or losses from operations that the Company has discontinued."

Critical Accounting Estimates and Policies

Critical accounting policies are defined as those that are reflective of significant judgments and uncertainties, and potentially result in materially different results under different assumptions and conditions. Application of these policies is particularly important to the portrayal of the Company's financial condition and results of operations. The discussion and analysis of the Company's financial condition and results of operations are based on the Company's consolidated financial statements, which

have been prepared in accordance with accounting principles generally accepted in the United States of America. The preparation of these consolidated financial statements requires management to make estimates and judgments that affect the reported amount of assets, liabilities, revenues and expenses. Actual results may differ from these estimates under different assumptions or conditions.

Revenue Recognition and Cost Estimation

The Company recognizes revenue when persuasive evidence of an arrangement exists, services have been rendered, the contract price is fixed or determinable, and collectibility is reasonably assured. The Company has a standard internal process that it uses to determine whether all required criteria for revenue recognition have been met. This standard internal process includes a monthly review of contract revenues and expenses by several levels of management. This review covers, among other matters, progress against schedule, project staffing and levels of effort, risks and issues, subcontract management, incurred and estimated costs, and disposition of prior action items. This monthly internal review is designed to determine whether the overall progress on a contract is consistent with the effort expended and revenue recognized to date.

The Company's revenues consist primarily of payments for the work of the Company's employees, and to a lesser extent, the pass through of costs for materials and subcontract efforts under contracts with the Company's customers. Cost of services consists primarily of compensation expenses for program personnel, the fringe benefits associated with this compensation, and other direct expenses incurred to complete programs, including cost of materials and subcontract efforts.

The majority of the Company's revenues are derived from cost-plus-fixed-fee, cost-plus-award-fee, firm-fixed-price, or time-and-materials contracts. Absent evidence to the contrary, the Company recognizes revenue as follows. Under cost-plus-fixed or award-fee contracts, revenues are recognized as costs are incurred and include an estimate of applicable fees earned. Under firm-fixed-price contracts, revenues are estimated on the percentage of completion method, on the basis of costs incurred in relation to estimated total costs, or upon delivery of specific products or services, as appropriate. For time-and-material contracts, revenues are computed by multiplying the number of direct labor-hours expended in the performance of the contract by the contract billing rates and adding other billable direct costs. Performance incentives are incorporated in certain contracts, which provide increased and decreased revenues based on actual performance compared to established targets. Incentives based upon cost performance are recorded when earned and other incentives and awards are recorded when the amounts are earned and can be reasonably determined, or are awarded. In certain circumstances, revenues are recognized when contract amendments have not been finalized. Prior to agreeing to commence work directed by the customer and before receipt of the written modification or amendment to the existing contract, the Company requires the completion of an internal memo that assesses the probability of the modification being executed in a timely fashion and the Company's ability to subsequently collect payment from the customer.

Contract revenue recognition inherently involves estimation. Examples of estimates include the contemplated level of effort to accomplish the tasks under contract, the cost of the effort, and an ongoing assessment of the Company's progress toward completing the contract. From time to time, as part of the Company's standard management processes, facts develop that require the Company to revise its estimated total costs or revenues. In most cases, these revisions relate to changes in the contractual scope of the Company's work. To the extent that a revised estimate affects contract profit or revenue previously recognized, the Company records the cumulative effect of the revision in the period in which the facts requiring the revision become known. Anticipated losses are recognized in the accounting period in which they are first determined.

Goodwill

Goodwill represents the excess of cost over the fair value of net tangible and identifiable intangible assets of acquired companies. Effective January 1, 2002, the Company adopted SFAS No. 142, and no longer amortizes goodwill, but rather goodwill is to be reviewed at least annually for impairment. The Company has elected to perform this review annually on June 30 of each calendar year. For acquisitions completed prior to the adoption of SFAS No. 141 and SFAS No. 142 on January 1, 2002, goodwill was amortized on a straight-line basis over periods ranging from two to twenty years.

Discontinued Operations

In September 2001, the Company executed a formal plan to exit certain commercial and foreign lines of business that no longer contribute to the Company's core competencies. Based on independent valuations, market comparable information and interest expressed in these businesses, an estimate has been provided for the likely net gains and losses to income expected from these businesses through the estimated dates of disposal. As a result, in accordance with APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, results of operations have been classified as discontinued and prior periods have been restated. The Company has segregated the net assets and liabilities held for sale, recorded all current and expected future losses and deferred all gains expected to be realized upon disposal of the respective entities. The amounts the Company will ultimately

realize could differ in the near term from the amounts estimated in arriving at the loss on disposal of the discontinued operations.

The Company's significant accounting policies, including the critical policies listed above, are described in the notes to the consolidated financial statements included in this report.

Accounting Pronouncements

Effective January 1, 2002, the Company adopted SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which replaces SFAS No. 121. SFAS No. 144 requires that long-lived assets be measured at the lower of carrying amount or fair value less cost to sell, whether reported in continuing operations or in discontinued operations. SFAS No. 144 also broadens the reporting of discontinued operations to include all components of an entity with operations that can be distinguished from the rest of the entity and that will be eliminated from the ongoing operations of the entity in a disposal transaction. The adoption of this new pronouncement had no impact on the consolidated financial statements.

Effective January 1, 2002, the Company adopted EITF 01-14, *Income Statement Characterization of Reimbursements Received for "Out-of-Pocket" Expenses Incurred*. EITF 01-14 requires that companies report reimbursements received for out-of-pocket expenses incurred as revenue, rather than as a reduction of expenses. As the Company has historically accounted for reimbursements for out-of-pocket expenses in the manner provided for under EITF 01-14, the adoption of the provisions of EITF 01-14 did not have an impact on the Company's consolidated financial position or results of operations.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13 and Technical Corrections*. Among other things, SFAS 145 rescinds both SFAS 4, *Reporting Gains and Losses from Extinguishment of Debt*, and the amendment to SFAS 4, SFAS 64, *Extinguishments of Debt Made to Satisfy Sinking Fund Requirements*. Through this rescission, SFAS 145 eliminates the requirement that gains and losses from the extinguishment of debt be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect. Generally, SFAS 145 is effective for transactions occurring after May 15, 2002. The Company does not believe that SFAS 145 will have a material impact on its future earnings or financial position.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS No. 146 nullifies Emerging Issues Task Force Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. This statement requires that an exit or disposal activity related cost be recognized when the liability is incurred instead of when an entity commits to an exit plan. The provisions of SFAS No. 146 are effective for financial transactions initiated after December 31, 2002. The Company does not believe that SFAS 146 will have a material impact on its future earnings or financial position.

In November 2002, the FASB issued Interpretation No. 45, *Guarantor's Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, an interpretation of FASB Statements No. 5, 57 and 107 and rescission of FASB Interpretation No. 34*. FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under guarantees issued. FIN 45 also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken. The initial recognition and measurement provisions of FIN 45 are effective for guarantees issued or modified after December 31, 2002. Accounting for guarantees issued prior to this date is unaffected by FIN 45.

In December 2002, the FASB issued SFAS No. 148, *Accounting for Stock-based Compensation – Transition and Disclosure, an amendment of SFAS No. 123*. SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure requirements of SFAS No. 123 to require more prominent and more frequent disclosures in financial statements about the effects of stock-based compensation. This statement is effective for fiscal years ending after December 15, 2002. The Company does not believe that SFAS No. 148 will have a material impact on the Company's future earnings or financial position.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

The Company's exposure to market risk relates to changes in interest rates for borrowings under the Company's senior term loan and the Company's revolving credit facility. These borrowings bear interest at variable rates. During the first quarter of 2002, the Company repaid all but \$25.0 million in borrowings outstanding under the Company's revolving credit facility. A hypothetical 10% increase in interest rates would have increased the Company's annual interest expense for the year ended December 31, 2002 by less than \$0.1 million.

In December 2001, the Company entered into an interest swap agreement in order to reduce the Company's exposure associated with the market volatility of fixed LIBOR interest rates. This agreement has a notional principal amount of \$25.0 million and, as

of December 31, 2002, had a rate of 6.83%. This agreement is a hedge against revolving debt of \$25.0 million, which bears interest at monthly floating LIBOR plus 1.00%. At stated monthly intervals the difference between the interest on the floating LIBOR-based debt and the interest calculated in the swap agreement are settled in cash. The value of the swap at December 31, 2002 was a negative \$3.3 million.

The Company does not use derivative financial instruments for speculative or trading purposes. The Company invests its excess cash in short-term, investment grade, interest-bearing securities.

The Company's investments are made in accordance with an investment policy approved by the board of directors. Under this policy, no investment securities can have maturities exceeding one year and the average maturity of the portfolio cannot exceed 90 days.

INDEPENDENT AUDITORS' REPORT

To the Board of Directors and Stockholders of ManTech International Corporation
Fairfax, Virginia:

We have audited the accompanying consolidated balance sheets of ManTech International Corporation and subsidiaries (the Company) as of December 31, 2002 and 2001, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States of America. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of ManTech International Corporation and subsidiaries at December 31, 2002 and 2001, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2002 in conformity with accounting principles generally accepted in the United States of America.

As discussed in Note 7 to the financial statements, effective January 1, 2002, the Company adopted Statement of Financial Accounting Standards No. 142, *Goodwill and Other Intangible Assets*.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
Years Ended December 31, 2002, 2001 and 2000

1. Description of the Business

ManTech International Corporation delivers a broad array of information technology and technical services solutions to U.S. federal government customers, focusing primarily on critical national defense programs for the intelligence community and Department of Defense. The Company designs, develops, procures, implements, operates, tests and maintains mission-critical, enterprise information technology and communication systems and infrastructures for the Company's federal government customers in the United States and 34 countries worldwide.

2. Summary of Significant Accounting Policies

Principles of Consolidation—The accompanying consolidated financial statements include the accounts of ManTech International Corporation and its majority-owned subsidiaries (the Company). Minority interest represents minority stockholders' proportionate share of the equity in one of the Company's consolidated subsidiaries. The Company's share of affiliates' earnings (losses) is included in the consolidated statements of income using the equity method. All intercompany accounts and transactions have been eliminated.

Use of Accounting Estimates—The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates involve judgments with respect to, among other things, various future economic factors that are difficult to predict and are beyond the control of the Company. Therefore, actual amounts could differ from these estimates.

Revenue Recognition—The majority of the Company's revenues are derived from cost-plus-fixed-fee, cost-plus-award-fee, firm-fixed-price, or time-and-materials contracts. Under cost-plus-fixed or award-fee contracts, revenues are recognized as costs are incurred and include an estimate of applicable fees earned. Under firm-fixed-price contracts, revenues are estimated on the percentage of completion method, on the basis of costs incurred in relation to estimated total costs, or upon delivery of specific products or services, as appropriate. For time-and-material contracts, revenues are computed by multiplying the number of direct labor-hours expended in the performance of the contract by the contract billing rates and adding other billable direct costs. Performance incentives are incorporated in certain contracts, which provide increased and decreased revenues based on actual performance compared to established targets. Incentives based upon cost performance are recorded when earned and other incentives and awards are recorded when the amounts are earned and can be reasonably determined, or are awarded. In certain circumstances, revenues are recognized when contract amendments have not been finalized. Prior to agreeing to commence work directed by the customer and before receipt of the written modification or amendment to the existing contract, the Company requires the completion of an internal memo that assesses the probability of the modification being executed in a timely fashion and the Company's ability to subsequently collect payment from the customer. Anticipated losses are recognized in the accounting period in which they are first determined.

Cost of Services—Cost of services consists primarily of compensation expenses for program personnel and direct expenses incurred to complete programs, including cost of materials and subcontract efforts.

Cash and Cash Equivalents—For the purpose of reporting cash flows, cash and cash equivalents include cash on hand, amounts due from banks, and short-term investments with maturity dates of three months or less at the date of purchase.

Property and Equipment—Property and equipment are recorded at original cost. Upon sale or retirement, the costs and related accumulated depreciation or amortization are eliminated from the respective accounts and any resulting gain or loss is included in income. Maintenance and repairs are charged to expense as incurred.

Depreciation and Amortization—Furniture and office equipment are depreciated using the straight-line method with estimated useful lives ranging from five to fifteen years. Leasehold improvements are amortized using the straight-line method over a life of five years, or the term of the lease, whichever is shorter.

Inventory—Inventory is carried at the lower of cost or market. Cost is computed on a specific identification basis.

Goodwill and Other Intangibles—Goodwill represents the excess of cost over the fair value of net tangible and identifiable intangible assets of acquired companies. Contract rights and other intangibles are amortized on a straight-line basis over periods ranging from three to eight years.

Software Development Costs—The Company accounts for software development costs in accordance with Statement of Financial Accounting Standards (SFAS) No. 86, *Accounting for the Costs of Computer Software to be Sold, Leased, or Otherwise Marketed*. For projects fully funded by the Company, significant development costs are capitalized from the point of demonstrated technological feasibility until the point in time that the product is available for general release to customers. Once the product is available for general release, capitalized costs are amortized on a straight-line basis over a five-year period or other such shorter period as may be required. The Company recorded \$841,000, \$690,000, and \$665,000 of amortization expense for the years ended December 31, 2002, 2001 and 2000, respectively. Capitalized software costs included in other intangibles at December 31, 2002 and 2001, were \$3,722,000 and \$2,759,000, respectively.

Employee Supplemental Savings Plan (ESSP) Assets—The Company maintains several non-qualified defined contribution supplemental retirement plans for certain key employees that are accounted for in accordance with Emerging Issues Task Force (EITF) Issue 97-14, *Accounting for Deferred Compensation Arrangements Where Amounts Earned Are Held in a Rabbi Trust and Invested*, as the underlying assets are held in rabbi trusts with investments directed by the respective employee. A rabbi trust is a grantor trust generally set up to fund compensation for a select group of management and the assets of this trust are available to satisfy the claims of general creditors in the event of bankruptcy of the Company. As required by EITF 97-14, the assets held by the rabbi trusts are recorded at fair value in the consolidated financial statements as Employee Supplemental Savings Plan Assets with a corresponding amount recorded as a deferred compensation liability in Accrued Retirement.

Impairment of Long-Lived Assets—Whenever events or changes in circumstances indicate that the carrying amount of long-lived assets, including goodwill, software development costs and other intangibles, may not be fully recoverable, the Company evaluates the probability that future undiscounted net cash flows, without interest charges, will be less than the carrying amount of the assets. If any impairment were indicated as a result of this review, the Company would recognize a loss based on the amount by which the carrying amount exceeds the estimated discounted future cash flows. The Company believes that no impairments exist as of December 31, 2002.

Income Taxes—Deferred income taxes are recognized based on the estimated future tax effects of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for income tax purposes. Valuation allowances are established when necessary to reduce deferred tax assets to amounts expected to be realized. Income tax expense represents the current tax provision for the period and the change during the period in deferred tax assets and liabilities. No provision is made for U.S. taxes on foreign subsidiaries where earnings are expected to be reinvested indefinitely.

Foreign Currency Translation—All assets and liabilities of foreign subsidiaries are translated into U.S. dollars at fiscal year-end exchange rates. Income and expense items are translated at average monthly exchange rates prevailing during the fiscal year. The resulting translation adjustments are recorded as a component of Accumulated other comprehensive income (loss).

Comprehensive Income (Loss)—Comprehensive income (loss) consists of net income (loss), unrealized gains or losses on the Company's cash flow hedge, and foreign currency translation adjustments and is presented in the Consolidated Statements of Changes in Stockholders' Equity.

Stock-Based Compensation—As permitted under SFAS No. 123, *Accounting for Stock-Based Compensation*, the Company accounts for stock-based compensation plans using the intrinsic value method under the recognition and measurement principles of Accounting Principles Board (APB) Opinion No. 25, *Accounting for Stock Issued to Employees* and related Interpretations. No stock-based employee compensation cost is reflected in the net income, as all options granted under those plans had an exercise price equal to the market value of the underlying common stock on the date of grant. In accordance with the provisions of SFAS No. 148, *Accounting for Stock-Based Compensation – Transition and Disclosure*, the following table illustrates the effect on net income and earnings per share if the Company had applied the fair value recognition provisions of SFAS No. 123 to stock-based employee compensation (in thousands).

| | Year Ended December 31, | | |
|---|-------------------------|---------|----------|
| | 2002 | 2001 | 2000 |
| Net income, as reported | \$ 19,151 | \$ 795 | \$ 1,739 |
| Deduct: Total stock-based employee compensation expense determined under fair value based method for all awards, net of related tax effects | (2,869) | (5) | (19) |
| Pro forma net income | \$ 16,282 | \$ 790 | \$ 1,720 |
| Earnings per share: | | | |
| Basic – as reported | \$0.75 | \$ 0.04 | \$0.10 |
| Basic – pro forma | 0.63 | 0.04 | 0.09 |
| Diluted – as reported | 0.74 | 0.04 | 0.09 |
| Diluted – pro forma | 0.63 | 0.04 | 0.09 |

For disclosure purposes, the fair value of each option is estimated on the date of grant using the Black-Scholes (Minimum Value) option-price model. Assumptions used in computing the pro forma effect of stock-based compensation are presented in note 10.

Fair Value of Financial Instruments—The carrying value of the Company’s cash and cash equivalents, accounts receivable, accounts payable and accrued expenses approximate their fair values.

New Accounting Pronouncements—Effective January 1, 2002, the Company adopted SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*, which replaces SFAS No. 121. SFAS No. 144 requires that long-lived assets be measured at the lower of carrying amount or fair value less cost to sell, whether reported in continuing operations or in discontinued operations. SFAS No. 144 also broadens the reporting of discontinued operations to include all components of an entity with operations that can be distinguished from the rest of the entity and that will be eliminated from the ongoing operations of the entity in a disposal transaction. The adoption of this new pronouncement had no impact on the consolidated financial statements.

Effective January 1, 2002, the Company adopted EITF 01-14, *Income Statement Characterization of Reimbursements Received for “Out-of-Pocket” Expenses Incurred*. EITF 01-14 requires that companies report reimbursements received for out-of-pocket expenses incurred as revenue, rather than as a reduction of expenses. As the Company has historically accounted for reimbursements for out-of-pocket expenses in the manner provided for under EITF 01-14, the adoption of the provisions of EITF 01-14 did not have an impact on the Company’s consolidated financial position or results of operations.

In April 2002, the FASB issued SFAS No. 145, *Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 13 and Technical Corrections*. Among other things, SFAS 145 rescinds both SFAS 4, *Reporting Gains and Losses from Extinguishment of Debt*, and the amendment to SFAS 4, *SFAS 64, Extinguishments of Debt Made to Satisfy Sinking Fund Requirements*. Through this rescission, SFAS 145 eliminates the requirement that gains and losses from the extinguishment of debt be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect. Generally, SFAS 145 is effective for transactions occurring after May 15, 2002. The Company does not believe SFAS 145 will have a material impact on its future earnings or financial position.

In June 2002, the FASB issued SFAS No. 146, *Accounting for Costs Associated with Exit or Disposal Activities*. SFAS No. 146 nullifies Emerging Issues Task Force Issue No. 94-3, *Liability Recognition for Certain Employee Termination Benefits and Other Costs to Exit an Activity (including Certain Costs Incurred in a Restructuring)*. This statement requires that an exit or disposal activity related cost be recognized when the liability is incurred instead of when an entity commits to an exit plan. The provisions of SFAS No. 146 are effective for financial transactions initiated after December 31, 2002. The Company does not believe SFAS 146 will have a material impact on its future earnings or financial position.

In November 2002, the FASB issued Interpretation No. 45, *Guarantor’s Accounting and Disclosure Requirements for Guarantees, Including Indirect Guarantees of Indebtedness of Others, an interpretation of FASB Statements No. 5, 57 and 107 and rescission of FASB Interpretation No. 34*. FIN 45 elaborates on the disclosures to be made by a guarantor in its interim and annual financial statements about its obligations under guarantees issued. FIN 45 also clarifies that a guarantor is required to recognize, at the inception of a guarantee, a liability for the fair value of the obligation undertaken. The initial recognition and measurement provisions of FIN 45 are effective for guarantees issued or modified after December 31, 2002. Accounting for guarantees issued prior to this date is unaffected by FIN 45.

In December 2002, the FASB issued SFAS No. 148, *Accounting for Stock-based Compensation—Transition and Disclosure, an amendment of SFAS No. 123*. SFAS No. 148 provides alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. In addition, SFAS No. 148 amends the disclosure

requirements of SFAS No. 123 to require more prominent and more frequent disclosures in financial statements about the effects of stock-based compensation. This statement is effective for fiscal years ending after December 15, 2002. The Company does not believe that the adoption of SFAS No. 148 will have a material effect on its future earnings or financial position.

Reclassifications—Certain reclassifications have been made to previously reported balances to conform to the current-period presentation.

3. Earnings per Share

Basic earnings per share has been computed by dividing net income available to common stockholders by the weighted average number of shares of Class A, Class B and Class C common stock outstanding during each period. Shares issued during the period and shares reacquired during the period are weighted for the portion of the period that they were outstanding. Diluted earnings per share have been computed in a manner consistent with that of basic earnings per share while giving effect to all potentially dilutive common shares that were outstanding during each period. In conjunction with the Company's Initial Public Offering, in January 2002 the Company effected a 16.3062- for-one stock split (see note 10). For periods prior to the effective date of the stock split, outstanding shares and per share data contained in these financial statements has been restated to reflect the impact of the stock split. The weighted average number of common shares outstanding is computed as follows:

| | Year Ended December 31, | | |
|--|-------------------------|------------|------------|
| | 2002 | 2001 | 2000 |
| Basic weighted average common shares outstanding | 25,685,239 | 18,589,976 | 18,460,867 |
| Effect of potential exercise of stock options | 272,522 | 159,621 | 159,621 |
| Diluted weighted average common shares outstanding | 25,957,761 | 18,749,597 | 18,620,488 |

4. Business Segment and Geographic Area Information

The Company operates as one segment, delivering a broad array of information technology and technical services solutions under contracts with the U.S. Government, state and local governments, and commercial customers. The Company's federal government customers typically exercise independent contracting authority, and even offices or divisions within an agency or department may directly, or through a prime contractor, use the Company's services as a separate customer so long as that customer has independent decision-making and contracting authority within its organization. No single customer accounted for 10% or more of the Company's accounts receivable or revenues as of or for the years ended December 31, 2002, 2001 and 2000. In addition, there were no sales to any customers within a single country except for the United States where the sales accounted for 10% or more of total revenue. The Company treats sales to U.S. Government customers as sales within the United States regardless of where the services are performed. Substantially all assets of continuing operations were held in the United States for the years ended December 31, 2002, 2001 and 2000. Revenues by geographic customer and the related percentages of total revenues for the years ended December 31, 2002, 2001 and 2000, were as follows (in thousands):

| | Year Ended December 31, | | |
|---------------|-------------------------|-----------|-----------|
| | 2002 | 2001 | 2000 |
| United States | \$497,442 | \$425,500 | \$373,989 |
| International | 2,777 | 5,936 | 4,838 |
| | \$500,219 | \$431,436 | \$378,827 |
| United States | 99.4% | 98.6% | 98.7% |
| International | 0.6 | 1.4 | 1.3 |
| | 100.0% | 100.0% | 100.0% |

5. Revenues and Receivables

The Company delivers a broad array of information technology and technical services solutions under contracts with the U.S. Government, state and local governments, and commercial customers. Revenues from the U.S. Government under prime contracts

and subcontracts, as compared to total contract revenues, were approximately 96% for each of the years ended December 31, 2002, 2001 and 2000. Approximately 38%, 35%, and 40% of the Company's revenues were generated under cost-reimbursable contracts for the years ended December 31, 2002, 2001 and 2000, respectively. The components of contract receivables are as follows (in thousands):

| | December 31, | |
|--|-------------------|------------------|
| | 2002 | 2001 |
| Billed receivables | \$ 101,013 | \$ 70,291 |
| Unbilled receivables: | | |
| Amounts currently billable | 19,780 | 14,706 |
| Revenues recorded in excess of estimated contract value or funding | 2,619 | 2,548 |
| Retainage | 3,573 | 1,988 |
| Indirect costs incurred in excess of provisional billing rates | 8,045 | 4,133 |
| Allowance for doubtful accounts | (1,908) | (1,610) |
| | <u>\$ 133,122</u> | <u>\$ 92,056</u> |

Indirect cost rates in excess of provisional billing rates on U.S. Government contracts are generally billable at actual rates less a reduction of 0.5% of the actual general and administrative rate base before a Defense Contract Audit Agency (DCAA) audit is completed. The balance remaining, as well as any retainage, is billable upon completion of a DCAA audit (see note 13). Revenues recorded in excess of contract value or funding are billable upon receipt of contractual amendments. Amounts currently billable consist principally of amounts to be billed within the next month.

6. Property and Equipment

Major classes of property and equipment are summarized as follows (in thousands):

| | December 31, | |
|---|-----------------|-----------------|
| | 2002 | 2001 |
| Furniture and equipment | \$ 24,464 | \$ 20,809 |
| Leasehold improvements | 5,605 | 4,571 |
| | <u>30,069</u> | <u>25,380</u> |
| Less: Accumulated depreciation and amortization | (20,938) | (18,765) |
| | <u>\$ 9,131</u> | <u>\$ 6,615</u> |

Depreciation and amortization expense for the years ended December 31, 2002, 2001 and 2000 was \$2,598,000, \$2,480,000, and \$2,837,000, respectively.

7. Goodwill and Other Intangibles

Effective January 1, 2002, the Company adopted SFAS No. 142, *Goodwill and Other Intangible Assets*. SFAS 142 requires, among other things, the discontinuance of goodwill amortization. In addition, SFAS 142 requires the Company to perform a transitional goodwill impairment test within six months from the date of adoption. In accordance with the standard, the Company completed the transitional goodwill impairment test and determined that a \$57,000 goodwill impairment charge was required. Under SFAS 142, goodwill is to be reviewed at least annually thereafter for impairment; the Company has elected to perform this review annually on June 30 of each calendar year. Goodwill amortization expense for the years ended December 31, 2001 and 2000 was \$1,138,000 and \$1,124,000, respectively. Net income for the years ended December 31, 2001 and 2000, assuming goodwill was not amortized during this period would have been \$1,835,000 and \$2,789,000, respectively. Fully diluted earnings per share for the years ended December 31, 2001 and 2000, assuming goodwill was not amortized during this period would have been \$0.10 and \$0.15, respectively.

The components of goodwill and other intangibles are as follows (in thousands):

| | December 31, | |
|--------------------------------|-------------------|------------------|
| | 2002 | 2001 |
| Goodwill | \$ 104,109 | \$ 18,034 |
| Other intangibles | 18,978 | 10,468 |
| | <u>123,087</u> | <u>28,502</u> |
| Less: Accumulated amortization | (18,853) | (17,546) |
| | <u>\$ 104,234</u> | <u>\$ 10,956</u> |

As of December 31, 2002, other intangibles of \$18,978 consist of the following (in thousands):

| | December 31, 2002 | |
|------------------------------|-----------------------|--------------------------|
| | Gross Carrying Amount | Accumulated Amortization |
| Amortized intangible assets: | | |
| Contract rights | \$ 9,763 | \$ 3,254 |
| Capitalized software | 6,994 | 3,272 |
| Noncompete agreements | 2,221 | 2,221 |

Aggregate amortization expense for the year ended December 31, 2002 was \$1,395,000.

Estimated amortization expense (in thousands):

| Year ending: | |
|-------------------|----------|
| December 31, 2003 | \$ 2,520 |
| December 31, 2004 | 2,193 |
| December 31, 2005 | 2,047 |
| December 31, 2006 | 1,167 |
| December 31, 2007 | 826 |

8. Debt

| | <u>26,000</u> | <u>72,312</u> |
| Less: Current portion of debt | 1,000 | 1,969 |
| Debt—net of current portion | <u>\$ 25,000</u> | <u>\$ 70,343</u> |

On December 17, 2001, the Company executed a new Business Loan and Security Agreement (the Agreement) with Citizens Bank of Pennsylvania, PNC Bank N.A., Branch Banking and Trust Company of Virginia, and Chevy Chase Bank, F.S.B. to refinance and replace the Company's prior agreement. The Agreement provides for maximum borrowings of \$71.4 million and consists of a \$65.0 million revolving credit facility and a \$6.4 million term loan. Under the term loan portion of the Agreement, the principal balance is payable in consecutive quarterly installments of \$492,308 on the last business day of each quarter commencing with the last business day of December 2001. The balance of the term loan was repaid in February 2002. The

maturity date of the Agreement is December 31, 2004. In July 2002, the Agreement was amended in order to modify the pricing grid and certain financial and negative covenants.

The maximum available borrowing under the revolving credit facility at December 31, 2002 was \$65.0 million. As of December 31, 2002, the Company was contingently liable under letters of credit totaling \$8,824,000, which reduce the availability to borrow under the revolving portion of the Agreement. The Company had \$23.0 million in borrowings at December 31, 2001, which were repaid immediately after the end of the period. Borrowings under the Agreement are collateralized by the Company's eligible contract receivables, inventory, all of the Company's stock in certain of its subsidiaries and certain property and equipment and bear interest at the agreed-upon London Interbank Offered Rate (LIBOR) plus 1.00% for the \$25.0 million outstanding. Additional borrowings would bear interest at LIBOR, or the lender's prime rate, plus market-rate spreads that are determined based on a company leverage ratio calculation. At December 31, 2002, the agreed-upon LIBOR rate was 1.42% for the \$25.0 million and the bank's prime rate was 4.25%. The aggregate annual weighted average interest rates were 9.15%, 8.41% and 8.75% for 2002, 2001 and 2000, respectively.

Under the Agreement, the Company is required to maintain specified financial covenants relating to fixed charge coverage, interest coverage, debt coverage, and to maintain a certain level of consolidated net worth. The Agreement also places limitations on additional borrowings, mergers, and related party transactions, issuances of capital stock and payment of dividends, and limitations with respect to capital expenditures. The weighted average borrowings under the revolving portion of the Agreement and a prior agreement during the years ended December 31, 2002, 2001 and 2000, were \$27,172,000, \$37,719,000, and \$43,876,000, respectively. In conjunction with the execution of the Agreement, the Company recorded \$357,000 in loan origination costs, included in other assets, which are being amortized ratably over the term of the Agreement.

On October 27, 2000, the Company executed the Second Amendment to the Amended and Restated Business Loan and Security Agreement (the Prior Agreement) with Mellon Bank N.A., First Union Commercial Corporation and PNC Bank N.A., which provided for maximum borrowings of \$76.0 million. The Prior Agreement consisted of a \$60.0 million revolving credit facility and a \$16.0 million term loan. Under the revolving portion of the Prior Agreement, the Company could borrow the lesser of defined percentages of receivables or \$60.0 million. Under the term loan portion of the Prior Agreement, the principal balance was payable in consecutive quarterly installments of \$800,000 on the last business day of each quarter commencing with the last business day of December 1998. A final payment of \$6.4 million was due upon expiration of the Prior Agreement on December 31, 2001.

Borrowings under the Prior Agreement were collateralized by the Company's eligible contract receivables, inventory, and certain property and equipment and accrued interest at the agreed-upon LIBOR plus market-rate spreads that varied according to the calculation of a certain Company leverage ratio. Under the Prior Agreement, the Company was required to maintain specified financial covenants relating to fixed charge coverage, interest coverage, debt coverage, and minimum consolidated net worth. The Prior Agreement also placed limitations on additional borrowing, mergers, and related party transactions, issuances of capital stock and payment of dividends, and limitations with respect to capital expenditures.

On January 15, 1998, the Company redeemed all 75,000 shares of its then outstanding Preferred Stock for a total of \$8,029,000, or \$107.05 per share. In order to provide the funding necessary to redeem the Preferred Stock, the Company executed a seven-year Subordinated Credit Agreement with First Source Financial LLP for \$8,000,000 on January 9, 1998. The remaining \$29,000 of funding was provided by the Company's revolving credit facility. The principal balance was payable in eight consecutive quarterly installments of \$888,889 on the first business day of each quarter commencing with the first business day of January 2003. A ninth and final payment of \$888,888 was due on the last business day of December 2004. Interest under the Subordinated Credit Agreement accrued at a fixed rate of 12.0% per annum and was payable quarterly in arrears. The balance and accrued interest associated with this facility was repaid in February 2002.

Debt outstanding at December 31, 2002, is scheduled to mature by the following calendar year ends: \$1,000,000 in 2003 and \$25,000,000 in 2004.

The total interest paid was \$2,671,000, \$5,005,000 and \$6,073,000, for the years ended December 31, 2002, 2001 and 2000, respectively.

The Company uses interest rate swap agreements to manage exposure to fluctuations in interest rates. At December 31, 2002, the Company had an unleveraged swap agreement with a member of the Company's banking group with a notional principal amount of \$25,000,000. This agreement was placed on December 17, 2001 and has a four-year term. The agreement has a fixed LIBOR rate of 6.83% and is settled in cash on a monthly basis.

Effective January 1, 2001, the Company adopted SFAS No. 133, *Accounting for Derivative Instruments and Hedging Activities*, which, as amended by SFAS No. 138, establishes accounting and reporting standards for derivative instruments, including some

derivative instruments embedded in other contracts, and for hedging activities. Upon adoption of SFAS No. 133, the Company recorded a \$704,000 (\$422,000 net of tax) transition adjustment in Other comprehensive loss as the cumulative effect of a change in accounting principle. The Company will reclassify this amount into interest expense over the remaining life of the interest rate swap. The amount of the transition adjustment that was reclassified into earnings over the 12 months following the initial adoption of SFAS No. 133 was \$180,000.

The Company hedges the cash flows of some of its long-term debt using an interest rate swap. The Company enters into these derivative contracts to manage its exposure to interest rate movements by achieving a desired proportion of fixed-rate versus variable-rate debt. In an interest rate swap, the Company agrees to exchange the difference between a variable interest rate and either a fixed or another variable interest rate, multiplied by a notional principal amount.

As of December 31, 2002, the Company has recognized the cash flow hedge at its fair value of \$3,326,000 in accounts payable and accrued expenses on the consolidated balance sheet. The interest rate swap qualifies for cash flow hedge accounting; therefore, an unrealized loss of \$2,622,000 (\$1,574,000 net of tax), representing the effective portion of the change in its fair value, is reported in other comprehensive loss and will be reclassified into interest expense. The ineffective portion of the change in fair value of the swap qualifying for cash flow hedge accounting is recognized in the consolidated statements of income in the period of the change. For the year ended December 31, 2002, the swap did not have any ineffectiveness for the cash flow hedge.

Management believes that the fair value of debt is not significantly different from what is recorded by the Company, based on comparable market rates on similar issues.

9. Income Taxes

For periods prior to the closing of the Company's Initial Public Offering on February 12, 2002, the Company accounted for earnings on a cash basis for federal income tax purposes. Effective as of the closing of the offering, the Company changed to the accrual method of accounting, resulting in previously deferred income being recognized for tax purposes. As such, taxes will be due with respect to the four taxable years beginning with the taxable year of the offering. Because the Company previously recognized the deferred income for accounting purposes and accrued for the taxes, the change in tax status and the tax payments will not affect the Company's earnings.

The domestic and foreign components of income before provision for income taxes and minority interest were as follows (in thousands):

| | Year Ended December 31, | | |
|----------|-------------------------|------------------|------------------|
| | 2002 | 2001 | 2000 |
| Domestic | \$ 37,687 | \$ 27,117 | \$ 13,401 |
| Foreign | 835 | 1,213 | (289) |
| | <u>\$ 38,522</u> | <u>\$ 28,330</u> | <u>\$ 13,112</u> |

The provision for income taxes was comprised of the following components (in thousands):

| | Year Ended December 31, | | |
|-------------------------------|-------------------------|--------------|--------------|
| | 2002 | 2001 | 2000 |
| Current provision (benefit): | | | |
| Federal | \$ 15,912 | \$ 6,576 | \$ 4,291 |
| State | 3,334 | 1,348 | 1,893 |
| Foreign | 274 | 216 | (203) |
| | <u>19,520</u> | <u>8,140</u> | <u>5,981</u> |
| Deferred provision (benefit): | | | |
| Federal | (3,123) | 3,078 | 606 |
| State | (724) | 714 | (732) |
| Foreign | 17 | 151 | 119 |
| | <u>(3,830)</u> | <u>3,943</u> | <u>(7)</u> |

| | | | |
|----------------------------------|-----------|-----------|----------|
| Total provision for income taxes | \$ 15,690 | \$ 12,083 | \$ 5,974 |
|----------------------------------|-----------|-----------|----------|

The provision for income taxes varies from the amount of income tax determined by applying the applicable U.S. statutory tax rate to pre-tax income as a result of the following:

| | Year Ended December 31, | | |
|---|-------------------------|-------|-------|
| | 2002 | 2001 | 2000 |
| Statutory U.S. Federal tax rate | 35.0% | 35.0% | 35.0% |
| Increase (decrease) in rate resulting from: | | | |
| State taxes—net of Federal benefit | 4.4 | 4.9 | 3.9 |
| Foreign taxes | 0.0 | (0.2) | (0.4) |
| Other—additional provision | — | — | 2.8 |
| Nondeductible items: | | | |
| Goodwill amortization | 0.1 | 1.2 | 2.5 |
| Other | 1.2 | 1.8 | 1.8 |
| Effective tax rate | 40.7% | 42.7% | 45.6% |

The Company paid income taxes, net of refunds, of \$12,420,000, \$3,508,000 and \$4,100,000 for the years ended December 31, 2002, 2001 and 2000, respectively.

Deferred income taxes arise from temporary differences between the tax basis of assets and liabilities and their reported amounts in the financial statements. A summary of the tax effect of the significant components of deferred income taxes follows (in thousands):

| | December 31, | |
|---|--------------|-----------|
| | 2002 | 2001 |
| Gross deferred tax liabilities: | | |
| Receivables and payables | \$ 25,565 | \$ 26,440 |
| Investments | 1,318 | 444 |
| Other assets | 1,530 | 954 |
| Total deferred tax liabilities | 28,413 | 27,838 |
| Gross deferred tax assets: | | |
| Tax credits and loss carryforwards | (3,600) | (2,600) |
| Accrued liabilities | (6,181) | (3,002) |
| Cash flow hedge | (1,326) | (826) |
| Allowance for potential contract losses and other contract reserves | (745) | (700) |
| Property and equipment | (831) | (311) |
| Total deferred tax assets | (12,683) | (7,439) |
| Less: Valuation allowance | 902 | 902 |
| Total deferred tax assets—net | (11,781) | (6,537) |
| Net deferred tax liabilities | \$ 16,632 | \$ 21,301 |

At December 31, 2002, the Company has state net operating losses of approximately \$8,109,000 that expire beginning 2003 through 2020. At December 31, 2002, the Company had capital loss carryforwards of \$2,033,000 and \$4,143,000 that expire in 2004 and 2008, respectively.

10. Stockholders' Equity and Stock Options

Initial Public Offering—The Company closed its Initial Public Offering on February 12, 2002. Net proceeds to the Company were approximately \$110.2 million, after deducting the estimated expenses related to the offering and the portion of the underwriting discount payable by the Company. Proceeds from the offering were used to repay subordinated debt of \$8.0 million,

the balance of the term loan of \$5.9 million, \$17.7 million of the revolving credit facility, plus accrued interest, and \$69.1 million was used to fund the Company's acquisition of Aegis Research Corporation on August 5, 2002. The balance of the net proceeds of the offering, in conjunction with additional borrowings under the Company's revolver, were used to fund the Company's \$35.3 million acquisition of CTX Corporation on December 11, 2002.

Reincorporation, Recapitalization and Stock Split—The Company is incorporated in Delaware and is the successor by merger to ManTech International Corporation, a New Jersey corporation. As a result of the merger, in January 2002 the Company reincorporated from New Jersey to Delaware and recapitalized its common stock. On the effective date of the merger, each outstanding share of the New Jersey corporation's common stock was exchanged for one share of the Company's Class A common stock or for one share of the Company's Class B common stock. Immediately after the merger, the Company effected a 16.3062-for-one stock split of the Company's Class A common stock and Class B common stock. In connection with the reincorporation and recapitalization, all of the Company's outstanding Treasury Stock was retired.

Follow-on Public Offering—The Company closed its Follow-on Public Offering on December 20, 2002. Net proceeds to the Company were approximately \$90.9 million, after deducting the estimated expenses related to the offering and the portion of the underwriting discount payable by the Company. Proceeds from the offering were used to repay indebtedness incurred in connection with the acquisition of CTX Corporation. The balance of the net proceeds of the offering, in conjunction with cash on hand, was used in 2003 to fund the Company's acquisition of Integrated Data Systems on February 28, 2003 and MSM Security Services, Inc. on March 1, 2003 for \$62.7 million and \$4.6 million, respectively (see note 17).

Common Stock—The Company has 150,000,000 shares of authorized Class A common stock, par value \$0.01 per share. The Company has 50,000,000 shares of authorized Class B common stock, par value \$0.01 per share. On December 31, 2002, there were 16,267,213 shares of Class A common stock outstanding and 15,631,004 shares of Class B common stock outstanding.

Holders of Class A common stock are entitled to one vote for each share held of record, and holders of Class B common stock are entitled to ten votes for each share held of record, except with respect to any "going private transaction" (generally, a transaction in which Mr. Pedersen, his affiliates, his direct and indirect permitted transferees or a group, generally including Mr. Pedersen, such affiliates and permitted transferees, seek to buy all outstanding shares), as to which each share of Class A common stock and Class B common stock are entitled to one vote per share. The Class A common stock and the Class B common stock vote together as a single class on all matters submitted to a vote of stockholders, including the election of directors, except as required by law. Holders of common stock do not have cumulative voting rights in the election of directors.

Stockholders are entitled to receive, when and if declared by the board of directors from time to time, such dividends and other distributions in cash, stock or property from the Company's assets or funds legally available for such purposes subject to any dividend preferences that may be attributable to preferred stock that may be authorized. Each share of Class A common stock and Class B common stock is equal in respect of dividends and other distributions in cash, stock or property, except that in the case of stock dividends, only shares of Class A common stock will be distributed with respect to the Class A common stock and only shares of Class B common stock will be distributed with respect to Class B common stock. In no event will either Class A common stock or Class B common stock be split, divided or combined unless the other class is proportionately split, divided or combined.

The shares of Class A common stock are not convertible into any other series or class of securities. Each share of Class B common stock, however, is freely convertible into one share of Class A common stock at the option of the Class B stockholder. Upon the death or permanent mental incapacity of the Mr. Pedersen, all outstanding shares of Class B common stock automatically convert to Class A common stock.

The predecessor corporation had three classes of common stock outstanding prior to the effective date of the merger: Class A common stock, Class B common stock and Class C common stock, of which the Class B common stock was redeemable and, therefore, not reflected as equity for accounting purposes. The Class A common stock was voting, no par value. The Class B common stock was nonvoting, no par value, and was mandatorily redeemable by the stockholder at any time or by the Company in the event of the involuntary or voluntary termination of the stockholder's position within the Company at a per share price to be determined by an independent valuation company. On January 6, 2000, the Company redeemed 6,582 shares of Class B common stock from an employee for \$566,082. On February 29, 2000, the Company redeemed 1,000 shares of Class B common stock from an outside Director for \$86,060. On December 18, 2000, the Company redeemed an additional 1,000 shares of Class B common stock from an outside Director for \$123,240. All of these shares were placed in Treasury at their redemption value. The Class C common stock was nonvoting, no par value.

Preferred Stock—The Company is authorized to issue an aggregate of 20,000,000 shares of preferred stock, \$0.01 par value per share, the terms and conditions of which are determined by the Company's board of directors upon issuance. The rights, preferences and privileges of holders of the Company's common stock are subject to, and may be adversely affected by, the rights

of holders of any shares of preferred stock that the Company may designate and issue in the future. At December 31, 2002, no shares of preferred stock are outstanding and the board of directors currently has no plans to issue a series of preferred stock.

Shares Held in Grantor Trust—At December 31, 2002 and 2001, there were an additional 609,296 shares of Class B common stock, with a cost value of \$640,000, reflected in equity in accordance with EITF 97-14, *Accounting for Deferred Compensation Arrangements where Amounts Earned are Held in a Rabbi Trust and Invested*. These shares are held in a Rabbi Trust to satisfy a defined contribution pension obligation, to be paid in stock for the benefit of Mr. Pedersen.

Stock Options—In January 2002, the board of directors adopted and the stockholders approved the Company's Management Incentive Plan (the Plan), designed to enable the Company to attract, retain and motivate key employees. In connection with the creation of the Plan, all options outstanding under the ManTech International Corporation 1995 Long-Term Incentive Plan were assumed. Awards granted under the Plan may be settled in cash, shares of Class A common stock or a combination thereof, or by stock units which provide for settlement in cash or deferred issuance of shares of Class A common stock. The aggregate number of shares of the Company's Class A common stock that is available for issuance under the Plan is 2,840,379 plus, in 2003 and each year thereafter, a number of additional shares equal to one and one-half percent of the number of shares of Class A common stock outstanding on December 31st of that year. The Management Incentive Plan expires in December 2012.

The plan is administered by the compensation committee of the Company's board of directors, although the board of directors may exercise any authority of the committee under the Plan and the compensation committee may delegate its authority under the Plan. Subject to the express provisions of the Plan, the committee has broad authority to administer and interpret the Plan, including the discretion to determine the exercise price, vesting schedule and the number of shares to be issued.

The Company has adopted the disclosure-only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*, which establishes financial accounting and reporting standards for stock-based compensation plans and for transactions in which an entity issues its equity instruments to acquire goods and services from nonemployees. The Plan provides that shares granted come from the Company's authorized but unissued Class A Common Stock. The exercise price of the options granted pursuant to the Plan was not less than 100% of the fair market value of the shares on the date of grant. No compensation cost has been recognized for issuances under the Plan. These options vest quarterly over a three-year period from the date of grant. In May 2002, options to purchase 159,621 shares were exercised.

There were no stock options exercisable at December 31, 2002. Information with respect to stock option activity and stock options outstanding at December 31, 2002, was as follows:

| | Number of Shares | Option Price Per Share | Weighted Average Price Per Share |
|---|---------------------|---------------------------|---|
| Shares under option, December 31, 2001 and 2000 | 159,621 | \$1.68 | \$ 1.68 |
| Options granted | 1,166,000 | 16.00 – 24.65 | 16.97 |
| Options exercised | (159,621) | (1.68) | 1.68 |
| Options forfeited | (48,000) | (16.00) | 16.00 |
| Shares under option, December 31, 2002 | 1,118,000 | \$16.00 – 24.65 | \$ 17.01 |
| Options vested at December 31, 2002 | — | N/A | N/A |

| Range of Exercise Prices | Number Outstanding | Weighted Average Remaining Contractual Life (years) | Weighted Average Exercise Price |
|--------------------------|-----------------------|---|---------------------------------------|
| \$16.00 | 951,000 | 9.10 | \$ 16.00 |
| \$18.55 – 22.03 | 23,000 | 9.55 | \$ 20.58 |
| \$22.99 – 24.65 | 144,000 | 9.71 | \$ 23.13 |
| | 1,118,000 | | |

The Company has 3-year options. For disclosure purposes, the fair value of each option is estimated on the date of grant using the Black-Scholes (Minimum Value) option-pricing model. The following weighted-average assumptions were used for option grants during the years ended December 31, 2002, 2001 and 2000, respectively: dividend yield of 0 percent (as the Company did not pay dividends during the periods presented); expected volatility of 32.1%, 0.0% and 0.0; expected average lives of 3 years, 1 year, and 2 years (based on the Company's experience); and, risk-free interest rates of 3.10%, 3.50%, and 6.25%. The weighted-average fair value of the stock options granted during the year ended December 31, 2002 was \$16.97. There were no stock options granted during the years ended December 31, 2001 and 2000.

11. Retirement Plans

The Company maintains nonqualified supplemental defined benefit pension plans for certain retired employees of an acquired company. The weighted average assumptions used in accounting for the Company's pension plans in 2002, 2001 and 2000 were as follows:

| | 2002 | 2001 | 2000 |
|--------------------------------|-------|-------|-------|
| Discount rate | 6.75% | 7.25% | 8.00% |
| Expected return on plan assets | 2.00 | 3.00 | 6.00 |
| Rate of compensation increase | N/A | N/A | N/A |

The discount rate is the estimated rate at which the obligation for pension benefits could effectively be settled. The expected return on plan assets reflects the average rate of earnings that the Company estimates will be generated on the assets of the plans. The plans were partially funded beginning in 1999. The rate of compensation increase reflects the Company's best estimate of the future compensation levels of the individual employees covered by the plans and is not applicable, as all covered employees had retired prior to 1998.

The following table sets forth the status of the plans (in thousands):

| | Year Ended December 31, | |
|---|-------------------------|-------------------|
| | 2002 | 2001 |
| Change in benefit obligation: | | |
| Benefit obligation at beginning of period | \$ 1,802 | \$ 1,707 |
| Interest cost | 124 | 131 |
| Actuarial (gain) loss | 84 | 139 |
| Benefits paid | (179) | (175) |
| Benefit obligation at end of period | 1,831 | 1,802 |
| Change in plan assets: | | |
| Fair value of plan assets at beginning of period | 238 | 203 |
| Employer contribution | 217 | 210 |
| Benefits paid | (179) | (175) |
| Fair value of plan assets at end of period | 276 | 238 |
| Funded status at end of period | (1,555) | (1,564) |
| Unrecognized actuarial loss | 297 | 219 |
| Unrecognized prior-service cost | 16 | 47 |
| Unrecognized net transition obligation | — | — |
| Net amount recognized at end of period | \$ (1,242) | \$ (1,298) |

The components of net periodic pension cost for the Company's defined benefit plans are provided in the following table (in thousands):

| | Year Ended December 31, | | |
|--|-------------------------|---------------|---------------|
| | 2002 | 2001 | 2000 |
| Interest cost on projected benefit obligation | \$ 124 | \$ 131 | \$ 131 |
| Net amortization of prior-service cost and transition obligation | 37 | 55 | 54 |
| Net periodic pension cost | \$ 161 | \$ 186 | \$ 185 |

The Company maintains two qualified defined contribution plans, which cover substantially all employees, which comply with Section 401 of the Internal Revenue Code. Under these plans, the Company's stipulated Basic Matching Contribution matches a portion of the participants' contribution based upon a defined schedule. Contributions are invested by an independent investment company in one or more of several investment alternatives. The choice of investment alternatives is at the election of each participating employee. The Company's contributions to the plans were approximately \$2,954,000, \$2,554,000 and \$2,420,000 for the years ended December 31, 2002, 2001 and 2000, respectively.

The Company maintains non-qualified defined contribution supplemental retirement plans for certain key employees. Under these plans the Company accrues a stated annual amount and may also include interest at the greater of 10% or the Company's annual rate of return on investments. The Company incurred expenses associated with these plans and contributed \$75,000 for each of the years ended December 31, 2002, 2001 and 2000.

The Company also maintains a non-qualified deferred compensation plan for certain key employees. Under this plan, eligible employees may defer up to 18% of qualified annual compensation. Employee contributions to this plan were approximately \$1,788,000, \$1,895,000 and \$1,875,000 for the years ended December 31, 2002, 2001 and 2000, respectively.

On December 18, 1998, the board of directors approved the establishment of a qualified Employee Stock Ownership Plan (ESOP), effective January 1, 1999, for the benefit of substantially all of the Company's U.S. domestic-based employees. The ESOP is non-leveraged and will be funded entirely through Company contributions based on a percentage of eligible employee compensation, as defined in the plan. Participants must be employees of the Company or eligible Company subsidiaries and must meet minimum service requirements to be eligible for annual contributions. The ESOP specifies a five-year vesting schedule over which participants become vested in the Class A common stock allocated to their participant account. The amount of the Company's annual contribution to the ESOP is at the discretion of the Company's board of directors.

For the years ended December 31, 2001 and 2000, the Company contributed and allocated to participants' accounts \$1,376,000 and \$1,419,000, respectively, worth of Class A common stock and cash. The board of directors has authorized an additional ESOP contribution for the year ended December 31, 2002. As of December 31, 2002, the Company has contributed 51,151 shares to the ESOP as partial satisfaction of this obligation; however, these shares have not yet been allocated to participants' accounts. It is anticipated that the remaining shares attributable to the year ended December 31, 2002 commitment will be issued to the ESOP during the first quarter of 2003. At December 31, 2002, an obligation to fund \$394,000 was accrued.

As required under Statement of Position No. 93-6, *Employers' Accounting for Employee Stock Ownership Plans*, compensation expense is recorded for shares committed to be released to employees based on the fair market value of those shares in the period in which they are committed to be released. The difference between cost and fair market value of the released shares, which were held in Treasury, of \$1,142,000 for the year ended December 31, 2001, is recorded in additional paid in capital. For the year ended December 31, 2002, new shares were issued to satisfy this obligation.

12. Investments

GSE Systems, Inc.—The Company and its designees hold stock in GSE Systems, Inc. (GSE), which was created by the merger of one of the Company's majority-owned subsidiaries and two other entities in April 1994. In January 2000, the Company purchased 116,959 additional shares of common stock in GSE, increasing the Company's ownership to 17.61%. The Company's ownership percentage of GSE was 15.59% at December 31, 2002. The Company's and its designee's ownership percentage of GSE was 17.97% at December 31, 2002. The Company also holds \$3.8 million of GSE convertible preferred stock and a \$650,000 demand note receivable from GSE as of December 31, 2002. This note accrues interest at the prime rate plus 1.00% and interest is payable monthly.

During the year ended December 31, 2001, the Company determined that it had obtained significant influence with respect to GSE. As a result, the Company began accounting for its investment in GSE using the equity method and recorded \$206,000 and (\$85,000) in equity earnings (losses) for the years ended December 31, 2002 and 2001, respectively. Additionally, the Company restated prior year amounts and recorded (\$1,555,000) in equity losses for the year ended December 31, 2000. The after-tax impact to net income as a result of this restatement was (\$934,000) for the year ended December 31, 2000. The related impact to basic and diluted earnings per share was (\$0.82) for the year ended December 31, 2000.

Vosper-ManTech Limited—On September 7, 1995, MASI U.K. Limited, a majority-owned subsidiary of the Company, and Vosper Thornycroft Limited entered into a Joint Venture agreement to form Vosper-ManTech Limited (the Joint Venture). MASI U.K. Limited holds a 40% ownership in the Joint Venture and Vosper Thornycroft Limited owns the remaining 60%. In 2000, the Joint Venture began work on a ten-year follow-on contract providing outsourcing of the Government Communications Headquarters (GCHQ) for the United Kingdom’s logistics and engineering services.

The Company’s interest in the Joint Venture is accounted for using the equity method. The Company recorded \$99,000, \$504,000 and \$393,000 in equity earnings for the years ended December 31, 2002, 2001 and 2000, respectively.

The components of investments are as follows (in thousands):

| | December 31, | |
|--------------------------|-----------------|-----------------|
| | 2002 | 2001 |
| GSE Systems, Inc. | \$ 5,645 | \$ 5,514 |
| Vosper-ManTech Limited | 1,986 | 2,268 |
| Total investments | \$ 7,631 | \$ 7,782 |

13. Commitments and Contingencies

Payments to the Company on cost-reimbursable contracts with the U.S. Government are provisional payments subject to adjustment upon audit by the DCAA. Audits through 2000 have been completed and resulted in no material adjustments. The audits for 2001 and 2002 are not expected to have a material effect on the results of future operations.

In February 2000, a judgment was entered against the Company in favor of Boston Properties, a real estate management firm, in the amount of \$1,175,000 for unpaid rent under a lease held by Boston Properties with Global-InSync, Inc. (Global). Global is the successor to a business sold by the Company in 1996. The Company provided a financial guarantee to Boston Properties on the lease to facilitate the timely closing of this business sale. Boston Properties and Global extended the original lease without notice to the Company. The legal action sought to recover unpaid rent beyond the term of the original lease. After losing the appeal, the Company paid this judgment and other related expenses in August 2000.

On October 9, 2002, the Company received a document subpoena issued by the Department of Defense Office of Inspector General. The Company is cooperating with the government. Based on the facts known to the Company, the Company does not expect the consequences of the government’s investigation to have a material adverse effect on its business, prospects, financial condition, or operating results. However, this investigation is at a preliminary stage and it is not possible to tell how it may develop in the future.

In the normal course of business, the Company is involved in certain governmental and legal proceedings, claims and disputes, and has litigation pending under several suits. Management believes that the ultimate resolution of these matters will not have a material effect on the Company’s financial position or results of operations.

The Company leases office space and equipment under long-term operating leases. A number of the leases contain renewal options and escalation clauses. At December 31, 2002, aggregate future minimum rental commitments under these leases are as follows (in thousands):

| | <u>Office Space</u> | <u>Equipment</u> | <u>Total</u> |
|-------------------|---------------------|------------------|------------------|
| Year ending: | | | |
| December 31, 2003 | \$ 9,424 | \$ 4,407 | \$ 13,831 |
| December 31, 2004 | 8,367 | 3,277 | 11,644 |
| December 31, 2005 | 7,434 | 1,981 | 9,415 |
| December 31, 2006 | 7,064 | 1,405 | 8,469 |
| December 31, 2007 | 5,045 | 29 | 5,074 |
| Thereafter | 7,057 | — | 7,057 |
| | <u>\$ 44,391</u> | <u>\$ 11,099</u> | <u>\$ 55,490</u> |

Office space and equipment rent expense totaled approximately \$12,815,000, \$10,804,000 and \$9,578,000 for the years ended December 31, 2002, 2001 and 2000, respectively.

14. Acquisitions

Each of the following acquisitions has been accounted for as a purchase, and accordingly, the operating results of each of the acquired entities have been included in the Company's consolidated financial statements since the respective dates of acquisition. The aggregate amount of goodwill and other intangibles resulting from the excess of the respective purchase prices over the fair market value of net assets acquired in 2002 was approximately \$85,902,000.

CTX Corporation—On December 11, 2002, the Company acquired 100 percent of the outstanding common shares of CTX Corporation (CTX). The results of operations for CTX have been included in the consolidated financial statements since that date. CTX is a leading provider of information technology and software strategies and solutions to the national intelligence community. CTX supports customers and programs within the national intelligence community, focusing primarily on mission critical IT and software services, including knowledge management, collaboration solutions, network engineering, and network forensics. The CTX technical professionals have expertise in commercially available technologies and operational experience with proprietary government systems. CTX solutions help intelligence community customers to: modernize information systems; collaborate across and within government enterprises; and develop and implement data mining techniques to better utilize information from large-scale data repositories.

The cash purchase price was approximately \$35.3 million, excluding \$0.5 million of acquisition-related costs, and included the repayment of \$1.5 million of existing CTX debt. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition (in thousands).

| | December 11, 2002 | |
|------------------------------|-------------------|---------|
| Current assets | \$ | 9,729 |
| Property and equipment – net | | 354 |
| Goodwill | | 25,879 |
| Intangible assets | | 4,455 |
| Other assets | | 52 |
| Other current liabilities | | (4,430) |
| | \$ | 36,039 |

\$4.0 million of the acquired intangible assets was assigned to contract rights and is being amortized on a straight-line basis over a period of eight years. The remaining \$455,000 of intangible assets was assigned to capitalized software and is being amortized over a period of 3 years.

The following represents the unaudited pro forma results of operations as though the acquisition of CTX had been completed as of January 1, 2001 (in thousands, except per share amounts):

| | Pro Forma Year Ended December 31, 2002 | Pro Forma Year Ended December 31, 2001 |
|---|--|--|
| Revenue | \$ 533,600 | \$ 455,493 |
| Income from continuing operations | 23,180 | 15,751 |
| Net income | 19,499 | 306 |
| Diluted earnings per share from continuing operations | 0.89 | 0.84 |

Aegis Research Corporation—On August 5, 2002, the Company acquired 100 percent of the outstanding common shares of Aegis Research Corporation (Aegis). The results of operations for Aegis have been included in the consolidated financial statements since that date. Aegis is a leading provider of enterprise protection strategies and technical services to the federal national security community. Aegis supports key customers and programs within the Department of Defense (DoD) and national intelligence community, including the National Reconnaissance Office, the United States Air Force, The Joint Strike Fighter Program Office, and the Counterintelligence Field Activity Program under the DoD. Aegis also supports numerous other classified customers on special access programs. Many of the approximately 500 Aegis employees have prior military or intelligence experience.

The cash purchase price was approximately \$69.1 million, excluding \$0.3 million of acquisition-related costs. The following table summarizes the estimated fair values of the assets acquired and liabilities assumed at the date of acquisition (in thousands).

| | August 5, 2002 | |
|------------------------------|----------------|---------|
| Current assets | \$ | 12,332 |
| Property and equipment – net | | 841 |
| Goodwill | | 60,023 |
| Intangible asset | | 2,737 |
| Other assets | | 114 |
| Other current liabilities | | (5,039) |
| Deferred Rent | | (1,633) |
| | \$ | 69,375 |

The acquired intangible asset of \$2.7 million was assigned to contract rights and is being amortized on a straight-line basis over a period of five years.

The following represents the unaudited pro forma results of operations as though the acquisition of Aegis had been completed as of January 1, 2001 (in thousands, except per share amounts):

| | Pro Forma Year Ended | |
|---|-------------------------|-------------------|
| | December 31, 2002 | December 31, 2001 |
| Revenue | \$ 533,669 | \$ 482,805 |
| Income from continuing operations | 23,869 | 17,095 |
| Net income | 20,188 | 1,650 |
| Diluted earnings per share from continuing operations | 0.92 | 0.91 |

Advanced Development Group, Inc.—On January 5, 1999, the Company acquired 100 percent of the outstanding common shares of Advanced Development Group, Inc. (ADG) for a purchase price of \$3.0 million and a note for \$2.0 million payable over two years (interest accrued at the prime rate). This acquisition also provided for additional cash payments, not to exceed \$5,000,000, to be made over the three years following the closing, based on the attainment of certain earnings levels. In May 2000, the Company paid \$495,000 against this obligation. At December 31, 2002, the Company has accrued a liability in the amount of \$230,000 to satisfy the remaining earn-out obligation. ADG specializes in the development of interactive multimedia and distance learning training products. It is the leading Interactive Multimedia Instruction (IMI) developer for the U.S. Army. In addition, ADG has developed a proprietary IMI Course Builder Program[®] to enable the development of high-quality, low-cost training products that incorporate sophisticated animation, graphics and video.

15. Discontinued Operations

On September 26, 2001, the Company executed a formal plan to exit certain commercial and foreign lines of business that no longer contribute to the core competencies. The businesses include the Australia-based software solutions consulting business, the United Kingdom-based bank remittance processing business, the China-based consulting business, the U.S.-based environmental consulting and remediation business and the U.S.-based application-hosting business. Although some of these ventures showed promise and growth, these businesses were oriented towards commercial customers and did not contribute to the core competencies on which the Company is currently focused. During the year ended December 31, 2002, the Company completed the sale of all of these businesses.

Based on the projected future costs of disposal, an estimate has been provided for the likely net gains and losses to income expected from these businesses through the estimated dates of disposal. As a result, in accordance with APB Opinion No. 30, *Reporting the Results of Operations—Reporting the Effects of Disposal of a Segment of a Business, and Extraordinary, Unusual and Infrequently Occurring Events and Transactions*, results of operations have been classified as discontinued and prior periods have been restated. The Company has segregated the net assets and liabilities held for sale, recorded all current and expected future losses and deferred all gains expected to be realized upon disposal of the respective entities. The amounts the Company will ultimately realize could differ in the near term from the amounts estimated in arriving at the loss on disposal of the discontinued operations.

Revenues and losses from discontinued operations are as follows (in thousands):

| | Year Ended December 31, | |
|---|-------------------------|-------------------|
| | 2001 | 2000 |
| Income statement data: | | |
| Revenues | \$ 37,587 | \$ 63,389 |
| Costs and expenses | (48,390) | (72,554) |
| Operating loss | (10,803) | (9,165) |
| Minority interest | 851 | 1,333 |
| Income tax benefit | 3,419 | 3,165 |
| Loss from discontinued operations net of tax and minority interest | \$ (6,533) | \$ (4,667) |

The estimated net loss on disposal of discontinued operations recorded for the year ended December 31, 2001 was \$8,912,000, net of an income tax benefit of \$5,857,000. This loss included a provision for anticipated closing costs and net operating losses through the estimated dates of disposal of \$5,020,000, net of an income tax benefit of \$2,922,000. Additional losses of approximately \$795,000 and \$2,886,000 were recorded in August and December 2002 associated with the sale of the United Kingdom-based bank remittance processing business and the Australia-based software solutions consulting business, respectively.

The Company's Australian-based software solutions consulting business disposed of its Local Government business on June 30, 2000 and recorded a loss on the disposal of \$719,000, net of tax. The revenues and operating losses of this business unit were not significant for the periods presented.

16. Quarterly Financial Data (Unaudited)

The following tables set forth selected unaudited quarterly financial data and the percentages such items represent of sales. The quarterly financial data reflects, in the opinion of the Company, all normal and recurring adjustments necessary to present fairly the results of operations for such periods. Results of any one or more quarters are not necessarily indicative of annual results of continuing trends.

| | 2002 Quarters Ended | | | | | | | |
|--|---------------------|--------|-----------|--------|---------------|--------|--------------|--------|
| | March 31, | | June 30, | | September 30, | | December 31, | |
| (In thousands, except per share data) | | | | | | | | |
| Revenues | \$108,134 | 100.0% | \$119,168 | 100.0% | \$130,425 | 100.0% | \$142,492 | 100.0% |
| Gross profit | 19,524 | 18.1 | 21,888 | 18.4 | 24,430 | 18.7 | 27,061 | 19.0 |

| Weighted average shares outstanding | 18,718 | | 18,718 | | 18,735 | | 18,826 | |

17. Subsequent Events

Acquisition of Integrated Data Systems—On February 28, 2003, the Company acquired 100 percent of the outstanding shares of Integrated Data Systems (IDS). The Company paid \$57.7 million (net of cash) plus estimated purchase price adjustments of approximately \$5.0 million. The transaction is also subject to an earnout provision. Founded in 1990, IDS delivers technology solutions and products in four core areas: software development, systems engineering/networking, information assurance, and government acquisition/procurement support software. IDS has developed secure, advanced messaging and collaboration applications and solutions in support of a wide variety of national security networks and systems. IDS is also one of Microsoft's leading certified partners supporting U.S. Government classified intelligence community programs.

Acquisition of MSM Security Services, Inc.—On March 1, 2003, the Company acquired 100 percent of the outstanding shares of MSM Security Services, Inc. (MSM), a Maryland-based provider of Personnel Security Investigation (PSI) services to the U.S. Government. The Company paid \$1.9 million in cash and the repayment at closing of existing MSM debt of \$2.7 million. The purchase price is subject to certain post-closing adjustments and is also subject to an earnout provision. MSM specializes in PSI services for the United States Government, having completed over 250,000 background investigations since its founding in 1978. MSM employs approximately 100 staff. MSM also developed and maintains a nationwide network of approximately 1,800 experienced contract investigators that support the company's mission. MSM has active investigation contracts to support the United States Customs Service, Defense Security Service (DSS), the intelligence community, and other federal government agencies.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

The Company has had no disagreements with its auditors on accounting principles, practices or financial statement disclosure during and through the date of the financial statements included in this Report.

PART III

The Information required by Items 10, 11, 12, and 13 of Part III of this Annual Report on Form 10-K has been omitted in reliance on General Instruction G(3) and is incorporated herein by reference to the Company's proxy statement to be filed with the SEC pursuant to Regulation 14A promulgated under the Securities Exchange Act of 1934, as amended.

ITEM 14. CONTROLS AND PROCEDURES

"Disclosure controls and procedures" are the controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports filed or submitted by it under the Securities Exchange Act of 1934, as amended (the "Exchange Act") is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms. These controls and procedures are designed to ensure that information required to be disclosed by an issuer in its Exchange Act reports is accumulated and communicated to the issuer's management, including its principal executive and financial officers, as appropriate, to allow timely decisions regarding required disclosure.

Within the 90 days prior to the date of this report, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the Company carried out an evaluation of the effectiveness of the design and operation of the Company's disclosure controls and procedures pursuant to the Exchange Act Rule 13a-14. Based upon the evaluation, the Chief Executive Officer and Chief Financial Officer concluded that the Company's disclosure controls and procedures are effective in timely alerting them to material information relating to the Company (including its consolidated subsidiaries) required to be included in the Company's periodic SEC filings.

Since the evaluation, there were no significant changes in the Company's internal controls or in other factors that could significantly affect the Company's disclosure controls and procedures, and there were no corrective actions with regard to significant deficiencies or material weaknesses required.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES, AND REPORTS ON FORM 8-K

(a) The following documents are filed as a part of this annual report on Form 10-K:

1. All financial statements:

| <u>DESCRIPTION</u> | <u>PAGE</u> |
|---|-------------|
| Independent Auditors' Report | 29 |
| Consolidated Balance Sheets as of December 31, 2002 and 2001 | 30 |
| Consolidated Statements of Income for the years ended December 31, 2002, 2001 and 2000 | 32 |
| Consolidated Statements of Changes in Stockholders' Equity for the years ended December 31, 2002, 2001 and 2000 | 33 |
| Consolidated Statements of Cash Flows for the years ended December 31, 2002, 2001 and 2000 | 34 |
| Notes to Consolidated Financial Statements | 36 |

2. Financial statement schedule:

| <u>SCHEDULE NO.</u> | <u>DESCRIPTION</u> |
|---------------------|--|
| Schedule II | Valuation and Qualifying Accounts for the years ended December 31, 2002, 2001 and 2000 |

3. Exhibits required by Item 601 of Regulation S-K:

| <u>EXHIBIT NO.</u> | <u>DESCRIPTION</u> |
|--------------------|---|
| 2.1 | Form of Plan of Merger by and between ManTech International Corporation, a New Jersey corporation, and ManTech International Corporation, a Delaware corporation, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended |
| 3.1 | Second Amended and Restated Certificate of Incorporation of the Registrant as filed with the Secretary of State of the State of Delaware on January 30, 2002, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended. |
| 3.2 | Amended and Restated Bylaws of the Registrant, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended |
| 4.1 | Form of Common Stock Certificate, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended. |
| 4.2 | Business Loan and Security Agreement with Citizens Bank of Pennsylvania, PNC Bank N.A., Branch Banking and Trust Company of Virginia, and Chevy Chase Bank, F.S.B., incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended. |
| 10.1 | Retention Agreement, effective as of January 1, 2002, between John A. Moore, Jr. and ManTech International Corporation, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended. |
| 10.2 | Form of Confidentiality, Non-competition and Non-solicitation Agreement, effective as of the closing of this offering, between specified executive officers and ManTech International Corporation, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended. |
| 10.3 | Management Incentive Plan of ManTech International Corporation, incorporated herein by reference from Registrant's Registration Statement on Form S-1 (File No. 333-73946), as filed with the Commission on November 23, 2002, as amended. |

INDEPENDENT AUDITORS' REPORT ON FINANCIAL STATEMENT SCHEDULE

To the Board of Directors and Stockholders of ManTech International Corporation
Fairfax, Virginia:

We have audited the consolidated financial statements of ManTech International Corporation and subsidiaries (the Company) as of December 31, 2002 and 2001, and for each of the three years in the period ended December 31, 2002 and have issued our report thereon dated February 21, 2003. Our audit also included the financial statement schedule for each of the three years in the period ended December 31, 2002 listed in Item 15(a)(2) of this Form 10-K. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion based on our audit. In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly in all material respects the information set forth therein.

EXHIBIT 14.1

Code of Ethics

Message from the Chairman

Dear Colleague:

The latest version of ManTech's Standards of Ethics and Business Conduct is attached for your review. This booklet contains important information on the standards of ethics and business conduct that are expected from all employees of ManTech International and its subsidiaries (collectively "ManTech").

The events of recent months emphasize the importance of ethics and integrity in business. The cost of failing to maintain the highest standards can be devastating to a business, its investors and employees. The greatest testimony to ManTech's employees is our ability to achieve our goals and objectives in a business environment that requires ethical business conduct that is consistent with the highest standards of integrity. ManTech's Standards of Ethics and Business Conduct provides direction on how ManTech employees should manage ManTech's business activities to maintain these standards.

Our reputation is our greatest asset. Our employees should be rightfully proud of our organization and the work we perform. I know that it takes a great deal of effort to provide our customers with the service they deserve and an even greater effort to maintain our corporate reputation. This is why as Chairman, CEO and President of ManTech International Corporation, I hereby pledge my commitment to follow and support ManTech's Standards of Ethics and Business Conduct. As evidenced by their signatures, the senior members of ManTech's operating subsidiaries have joined me in pledging their full commitment and support for these Standards. We expect a similar commitment from you and every other employee of ManTech.

Please read the attached booklet on ManTech's Standards of Ethics and Business Conduct carefully. ManTech is counting on your compliance with the letter and spirit of these standards as well as your assistance with identifying and correcting any problems that may arise in the areas of business ethics and conduct.

I recommend that you keep this booklet in a convenient place and refer to it whenever a question arises in your mind. In the event that further clarification is required, please contact your supervisor, your human resource representative or the designated Corporate Ethics Program representative listed on the last page of this booklet.

I recommend that you keep this booklet in a convenient place and refer to it whenever a question arises in your mind propriety of a course of action. In the event that further clarification is required, please contact your supervisor, your human resources representative, or the designated Corporate Ethics Program Representative listed in the last page of this booklet.

ManTech International Corporation

/s/ George J. Pedersen
Chairman of the Board CEO and President

INTRODUCTION

It is the policy of ManTech to conduct its business in accordance with the applicable laws and ethical standards of the jurisdictions in which ManTech operates. Each employee is required to read, understand and follow the Standards set forth in this booklet. Moreover, ManTech will treat each employee as having actual notice of the Standards discussed this booklet and ManTech's requirement that they be followed. The Standards should not be considered all-inclusive and all employees are hereby advised to refrain from engaging in any conduct that could discredit their professional reputation or that of ManTech. Such inappropriate acts may result in adverse employment action. Additional guidance regarding these Standards may be obtained from your immediate supervisor, your local Human Resources Representative, or the Corporate Compliance Department.

COMMITMENTS

ManTech's reputation is its most valuable asset. The caliber of the employees, the quality of the services they provide and the manner in which they perform these services all impact ManTech's reputation. In order to maintain and further enhance this reputation, we must fulfill commitments to our customers, our teammates, our suppliers, our communities and each other. ManTech's values, which form the basis of ManTech's commitment to maintaining a high standard for business ethics, are summarized below:

- . To our customers, we are committed to providing quality products and services that meet or exceed contractual requirements and to meeting required schedules and budgets within the parameters of applicable law and regulation. We are also committed to the protection and handling of classified information in accordance with established rules and regulations.
- . To our teammates and suppliers, we will practice fair competition, seeking long-lasting business relationships and a sense of responsibility that will enable us to be a valued customer. We will not discriminate against potential teammates or suppliers based on race, religion, color, national origin, age, sex, handicap or other factors not related to ManTech's business interest. We will endeavor to protect all proprietary information belonging to any organization that has entrusted it to us.
- . To the many communities in which we reside and to society as a whole, we are committed to responsible corporate citizenship. We will conduct ourselves in an ethical manner in all aspects of our business. We are committed to complying with federal, state, and local laws and regulations.
- . To our shareholders, we are committed to pursuing our growth and earnings objectives while abiding by our ethical standards. We will exercise prudence in the use of ManTech's corporate assets and resources.
- . To our employees, we are committed to treating one another fairly and implementing employment practices and programs related to compensation, training, and health on the basis of equal opportunity for all employees. We will provide safe and healthy working conditions and maintain programs intended to prevent work-related injuries and accidents. We will conduct ourselves professionally and treat each other with the dignity and respect due all human beings.

STANDARDS

A. Conflicts of Interest

A conflict of interest arises in any situation that can result in a problem between the private interests of a ManTech employee and that person's official responsibilities on behalf of ManTech.

1. General Principle on Conflicts of Interest.

We must avoid situations, both on and off the job, where a conflict of interest or the perception of such a conflict could result. Employees should avoid any outside financial interest that might influence their decisions or actions as employees of ManTech. Employees should also avoid any outside employment or activities that could have a negative impact on the performance of their job, that could conflict with their obligations to ManTech, or that could affect ManTech's reputation in the community in a negative manner.

2. Use of Inside Information for Financial Gain.

ManTech employees must never use or disclose to others, inside information (that which is not available to the general public) for any kind of personal gain, such as through trading in shares of stock. Examples of inside information include ManTech's pricing for services or products, burden rates, business strategies, acquisition candidates and banking relations. Non-public information shall not be used by any ManTech employee for private gain or disclosed to persons other than ManTech employees or others who have a legitimate business need for the information.

The trading of securities of publicly-traded companies while in possession of

material, nonpublic information relating to those companies must be avoided. Liability could also extend to an employee who "tips" another person about such information where that person, in turn, conducts securities transactions.

Tipping is a serious breach of corporate confidentiality as well as being considered a form of insider trading. For this reason, every employee must avoid discussing sensitive information in any place (for instance, at lunch, on public transportation, in elevators) where such information may be heard by others. Each of these prohibitions applies equally to family members and others living in the same household as an employee. Employees are expected to be responsible for the compliance with this policy by members of their immediate family and personal household.

Information should be considered material if it would be considered important by investors making decisions on whether to purchase, sell or hold the securities of the company in question. Stated another way, information should be considered "material" if it would alter the total mix of information available to the public (for example, knowledge of merger and acquisition discussions).

Information should be treated as being nonpublic unless a reasonable period of time has passed since it has been distributed by means likely to result in a general public awareness of the information. Such awareness would result, for example, by publication of the information in a daily newspaper. As a general rule, information may be considered to be public two business days after it has been broadly distributed to the general public.

3. Outside Financial Interests.

A conflict of interest or the appearance of a conflict can arise when an employee or an employee's family member holds an investment interest in or is an employee, official or director of another enterprise, particularly if that enterprise is a supplier of

products or services to ManTech or is a competitor of ManTech. While such circumstances are not automatically prohibited, they are not desirable. With the exception of relatively small holdings of stock in a publicly traded company that does business with ManTech, such activities require prior disclosure to and written approval of the Senior Vice President of Corporate Compliance.

B. Dealings with Customers, Suppliers, Subcontractors, Agents, and Consultants

It is ManTech's policy to compete for business solely on the merits of its products and services. ManTech will conduct business with its teammates and suppliers in an ethical and honest fashion. It is a violation of these Standards for any ManTech employee to seek a competitive advantage through the use of gifts, gratuities, entertainment or other favors.

1. General Principle regarding Gifts and Gratuities

Under no circumstances may we offer or give gifts of money or other gratuities to a customer or a customer's representative in an effort to influence a contract award or other favorable customer action. Further, the acceptance of a gift of money from a supplier, vendor, subcontractor or consultant is also prohibited.

Employees may accept unsolicited, non-monetary gifts from a firm or individual doing, or seeking to do, business with ManTech only if the gift is of nominal value or is of an advertising/promotional nature. For purposes of this paragraph, "nominal value" shall mean an amount not greater than Fifty Dollars (\$50).

2. Gifts in Foreign Countries or to Foreign Nationals.

Customary business practice in some foreign countries may call for the exchange of gifts. In cases where it is necessary to meet such a requirement, only ManTech may provide the gift and any gifts received will become ManTech property. Such gifts may only be made after consultation with the Corporate Compliance Department.

3. Kickbacks.

Employees (or their families) may not personally receive kickbacks, rebates, or anything else of value in exchange for the purchase or sale of goods or services to ManTech. Kickbacks or "rebates" can take many forms and are not limited to direct cash payments or credits. In general, if you or your family are in a position to gain personally through a purchase or sales transaction with ManTech, that transaction is prohibited. Such practices are unethical and may be against the law.

4. ManTech's Purchasing Policies

Whenever possible, materials, supplies, equipment, and other services purchased by ManTech should be procured from qualified suppliers at the lowest reasonable cost, keeping in mind the requirements for quality, performance and the vendor's ability to meet delivery schedules. Whenever feasible, we will encourage, establish and maintain competition among potential suppliers qualified for the award of contracts. We will comply with applicable Government regulations and contractual requirements governing ManTech's purchasing power, including those pertaining to small, minority-owned, or women/disadvantaged-owned businesses.

5. Other Improper Payments

Any payment which is improper when made by an employee is also improper if made by an agent, consultant, or other third party on behalf of ManTech. In addition, paying a third party for any purpose other than disclosed on the supporting documentation is strictly forbidden.

C. Antitrust or Anticompetitive Behavior

A wide range of transactions or practices is prohibited under the antitrust laws of the United States. No agreement or understanding may be made with competitors to fix or control prices; to allocate products, customers, markets, or territories; to boycott certain customers or suppliers; to exchange information with our competitors about prices; or to refrain from or limit the manufacture, sale or production of any product.

Antitrust laws sometimes restrict the use of joint ventures to produce or market a product or service. Teaming agreements, which are frequently used to bid for work under government contracts, may also be governed by the antitrust laws. In general, joint ventures and teaming agreements are not prohibited where cooperation between companies is necessary to provide the products or services under the contract, which the companies are not able to provide on their own. If ManTech is

considering forming a joint venture or participating in a teaming agreement with another company to bid on a government contract, that fact may have to be disclosed to the Government in advance.

D. Quality/Testing

It is our responsibility to ensure that our products and their components are designed and manufactured to meet the appropriate inspection criteria of our customers, to perform the testing necessary to demonstrate that these criteria have been met, and to provide the necessary documentation. The inspection and testing documentation must be complete, accurate and truthful.

If a contract requires that goods from a particular source be used, this obligation must be fulfilled. If specified products are not available, ManTech will not accept any substitute materials, even if they might be equivalent in form, without informing the appropriate customer.

If a product or design required by a customer is judged to be unsafe to the users of the product, the customer should be formally advised of this condition as soon as it is known.

E. ManTech, Customer and Other Third Party Resources

ManTech, customer and other third party resources include labor, technology, buildings, land, equipment, confidential information, trade secrets, literary works, intellectual property such as patents and copyrights, and cash.

1. Use of ManTech, Customer and Other Third Party Resources.

No employee may make improper use of ManTech, customer or third party resources or permit others to do so. Examples of improper use of resources include: unauthorized use of language of another author and the representation of that language as one's own, unauthorized appropriation or use of ManTech, customer or other third party assets such as telephones, supplies and materials; technology and patents; software; computer and copying equipment; and alteration, destruction or disclosure of data. If assets that are no longer needed by ManTech are sold to employees, all such sales must be supported by proper documentation and approved by an authority other than the employee.

2. Confidential Information, Technology, and Trade Secrets

One of ManTech's strengths is our ability to develop and use technological products and services in our day-to-day operations. We are therefore all responsible for safe-guarding ManTech's confidential information, technology, and trade secrets against unauthorized disclosure. This responsibility also includes protection of proprietary data developed or purchased by us or entrusted to us by customers, teammates, prime-contractors, sub-contractors, joint-venture partners or suppliers. These restrictions apply whether the information is in written or electronic form or is simply known by us.

- . Employees may not disclose or use ManTech or customer proprietary information except as required by the normal business activity of ManTech in meeting its contractual obligations to customers. All such disclosures shall be made pursuant to relevant disclosure obligations.
- . Employees may not take, disclose, or use ManTech or customer proprietary information upon terminating employment with ManTech unless authorized in writing to do so by a Vice President or President of the relevant ManTech subsidiary.
- . Employees must disclose in writing to ManTech any inventions and copyrights arising out of his or her employment by ManTech. All inventions and copyrights discovered, conceived or implemented either alone or jointly with others, during ManTech work hours or with ManTech resources are deemed assigned to ManTech as such rights arise.

These obligations are thoroughly discussed in the Confidentiality, Inventions and Non-Solicitation Agreement that you already signed with ManTech.

3. Cash and Bank Accounts

All cash and bank account transactions must be handled carefully so as to avoid any question or appearance of bribery, kickbacks, other illegal or improper payment, or any suspicion of impropriety whatsoever. All cash transactions must be recorded in ManTech's books of account.

All accounts shall be established and maintained in the name of ManTech, with the exception of petty cash accounts. All transactions and accounts involving ManTech funds shall be clearly and accurately identified in ManTech's books and records. All cash received shall be promptly recorded on its books and deposited in a ManTech bank account. No funds shall be maintained in the form of cash, except as required for normal business operations.

F. Political Contributions

1. Federal Elections.

Federal law prohibits corporations from making contributions or expenditures in federal elections. It is imperative that no ManTech funds or assets are contributed or loaned, directly or indirectly, to any political party, campaign or candidate, or expended to support opposition to a federal party, campaign or candidate.

While ManTech's corporate money may not be used in federal elections, ManTech has established a separate fund, called a political action committee ("PAC"), to raise voluntary contributions from employees for use in federal elections. Contributions to ManTech's PAC are voluntary and employees who do not contribute will not be subject to job discrimination or threats of reprisal.

2. State and Local Elections.

ManTech's ability to make political contributions in state and local elections depends upon the laws of the state and/or locality of the election. Accordingly, no ManTech employee may commit ManTech funds or resources in any way in a state or local election without the prior review and approval of the Senior Vice President of Corporate Compliance.

3. Political Activity.

ManTech encourages all employees to participate on an individual basis in political activities that interest them, on their own time and in their own way.

G. International Business

1. General Principles.

ManTech has global business operations and special care must be taken by employees to identify and accommodate the various customs and expectations that exist in the international markets. Laws vary widely from country to country, and may conflict with one another. Our policy is to comply with all laws that apply in the countries where we do business to the maximum extent permissible by United States law.

2. Export Restrictions.

Export of ManTech's products or services and disclosure of the technology involved in such products or services are subject to several laws and regulations. It is essential that ManTech comply with all export control and licensing requirements by obtaining proper permits and approvals from relevant government agencies. Because of the complexity of the laws in this area, employees having questions about the appropriate practice in a particular situation should seek guidance from the Legal Department through their supervisor.

3. Payments to Foreign Officials.

Employees should be particularly mindful of the prohibitions of the Foreign Corrupt Practices Act. This act prohibits payments or gifts to any foreign official, political party, party official, member of a ruling family, or any other person acting on behalf of a foreign nation in order to obtain or retain business, or to direct business to ManTech or to some other person or entity. All such payments are prohibited by the Foreign Corrupt Practices Act, whether made directly or indirectly through a third party. Prior to taking such action, each proposal to make payments or gifts to foreign persons or entities should be reviewed by the Corporate Compliance Department in coordination with the Legal Department.

H. Doing Business With the U.S. Government

Much of ManTech's business involves a close working relationship with branches of the U.S. government. Therefore, ManTech employees working on projects for which the ultimate customer is the U.S. government must be aware of and comply with the laws, rules, and regulations that govern the acquisition of goods and services by the U.S. government. ManTech also requires its business partners, suppliers, and consultants to be aware of and comply with these legal requirements.

1. Security

ManTech has a special obligation to comply with those Government regulations and laws that protect our nation's security and safeguard our nation's defense secrets, including classified information. As employees, security is an integral part of our jobs, whether or not we work directly with classified information. Any employee who observes or gains knowledge of a potential violation of the security regulations and/or laws relating to classified or government information must immediately report it to the respective ManTech Facility Security Officer or the Corporate Compliance Department.

Employees possessing a valid security clearance and requiring access to specific classified information will ensure that such information, in whatever form it exists, is handled in strict compliance with the procedures set forth by the Department of Defense for safeguarding classified information.

ManTech employees should not seek access to, accept or retain any classified information for which they have no need or to which they are not entitled. The unauthorized possession or disclosure of classified information in any form, or failure to properly safeguard such information, can endanger the security of this country and is punishable under the Espionage Laws and other Federal Criminal Statutes.

2. Procurement Integrity - Procurement Sensitive Information

ManTech competes fairly and ethically for all of its business opportunities. Therefore ManTech will not conduct business with any business partner, dealer, agent, or consultant involved in the unauthorized disclosure or use of procurement-sensitive or classified information about a procurement. This prohibition includes disclosing information about competitors' bids or proposals, or obtaining such information through improper or illegal means. Persons with access to proprietary or source selection information may disclose such information only to a person specifically authorized to receive it.

3. Procurement Integrity - Dealings with Government Procurement Officials.

The procurement integrity laws impose certain restrictions on the activities of government procurement officials and their contractor counterparts when they are engaged personally and substantially in a government procurement. In general, prohibited activities include: (1) offering, discussing, or accepting post government employment or business opportunities, (2) offering or accepting any money, gratuity, or other thing of value, or (3) soliciting, obtaining, or disclosing any bid or proposal information, proprietary or source selection information. Because of the complexity of the laws and the significant penalties that can be imposed for violations of these laws, only ManTech's Senior Management and Human Resources Officials are authorized to conduct employment discussions with any U.S. federal agency employees or former employees. Employees should refer questions covering the laws, requirements or possible violations of the law to their supervisor and, if deemed necessary, the Corporate Compliance Department. Proper advice should be obtained in advance of any action that could be perceived as a possible violation of the law.

4. Procurement Integrity - Truth in Negotiations.

Under the Truth in Negotiations Act, employees involved in the negotiation of contracts or other business transactions related to U.S. government procurement must ensure that all cost and pricing data is provided, to the extent required, to the U.S. government and that it is current, accurate, and complete; and that any other statements, communication, certificates, and representations to customers' representatives are accurate and truthful. In addition, any employee signing any certification or representation on behalf of ManTech should ensure it is accurate and truthful before signing.

5. Lobbying - Use of appropriated funds.

U.S. government appropriated funds (funds derived from federal contracts) may not be used to pay anyone to influence, or attempt to influence, anyone employed by the Executive or Legislative Branches, including members of Congress and their staffs, in connection with the award of U.S. government contracts or contract modifications.

6. Time Sheet Reporting

Timely and accurate completion of time sheets by all employees is essential. Employees must ensure that costs are recorded to the proper direct (contract) or indirect activity in accordance with contract terms or regulation. A summary of time keeping procedures are enumerated below. Please refer to the Corporate Policy manual for complete context of the Timekeeping Policy.

a. Employees should personally record their time on their time sheets. Execution and submission of a time sheet creates a certification as to the accuracy of the time sheet whether by electronic or manual means.

b. Time sheets should be filled out daily. Paper time sheets must be completed in ink.

c. Employees should record time actually worked in accordance with Policy

310.0/310.100 and Policy 234.0/234.100.

d. Corrections to submitted time sheet should be done in accordance with policy. No erasures or white out allowed.

e. Corrections/adjustments to submitted time sheets should be submitted on the ManTech Labor Adjustment form as soon as such corrections/adjustments become known.

f. Supervisors should provide each employee with a "Work Authorization Form" identifying account codes and descriptions for any activity on which the employee will perform tasking.

g. Supervisors should review the time sheets and labor adjustment forms for accuracy and completeness. They should certify as to the accuracy by approving the timesheet with their signature (electronically or manually).

7. Restrictions on Former Government Employees

There are specific rules and regulations that place certain limits on the duties that former U.S. Government employees (military or civilian) may perform as employees of ManTech. As a general guide, no former Government employees should represent ManTech in dealings with the Government on (i) any project in which they were substantially involved while in Government service, or (ii) any project for which they had responsibility during the two (2) year period before they left Government service. In addition, certain former Senior Government employees should not communicate with their former department or agency on any business matter for one year after leaving the Government.

Senior Government employees are: (a) those who were compensated at the executive level; (b) active-duty Armed Services officers compensated at a pay grade of 0-9 or above; (c) employees designated as having significant decision-making or supervisory responsibilities and who were compensated as a GS-17 or above; and (d) former active duty Armed Services officers having had significant decision-making or supervisory responsibility and who were compensated at a pay grade of 0-7 or 0-8.

These laws prohibit the former official or employee from appearing before or communicating to the government agency on behalf of another person. The former official or employee may, however, work on or provide advice about matters pending before government agencies "behind the scenes" here at ManTech. However, because of the complexities of the laws, employees should refer questions regarding whether a former Government employee, who is currently a ManTech employee, may participate in a project, presentation or contact with a Government agency to their supervisor or to the Corporate Compliance Department.

I. Books and Records

1. Falsification of Books and Records

Federal law requires that ManTech's books and records accurately reflect the nature of the transactions represented. ManTech will maintain its books and records in accordance with the Generally Accepted Accounting Principles. It is a violation of these Standards for any employee to cause ManTech's books and records to be inaccurate. Employees may not create or participate in the creation of any records that are intended to mislead or to conceal anything improper. Examples of prohibited conduct:

a. Making records appear as though payments were made to one person when, in fact, they were made to another;

b. Submitting expense accounts which do not accurately reflect the true nature of the expense;

c. Creation of records that do not accurately reflect the true nature of the transaction.

d. Creation of "slush fund," hidden, or "off-book" accounts, where there is no accounting for receipts or expenditures on corporate books.

2. Retention of Books and Records.

Federal and state law require that ManTech retain certain records for various periods of time, including tax, employment, health and safety records, and records relating to government contracts. In addition, when litigation or a government investigation or audit is pending, relevant records cannot be destroyed or otherwise disposed of until the matter is closed and only then if doing so is within the terms of the investigation or audit close-out. Destruction of records relevant to a legal proceeding, audit, or investigation may be a violation of law. All approved documents destruction should be conducted in strict compliance with ManTech's document destruction policy.

J. Drug Free Workplace/Workforce

1. General Principles.

All ManTech employees and worksites should be drug-free. The unlawful manufacture, distribution, dispensing, possession or use of controlled substances by employees on ManTech or assigned premises is strictly prohibited. Employees who violate this policy will be subject to adverse employment action, up to and including discharge. After prior consultation with Corporate Human Resources, illegal drug use may be reported to the proper authorities

ManTech employees working at non-ManTech locations are subject to these Standards and are also expected to comply with related regulations at the host site, whether it is that of a customer or another company with which ManTech has a business relationship.

2. Employee Assistance.

Confidential employee assistance on drug abuse (and other personal or family problems) is available to employees and their families through a ManTech-provided counseling and referral service. Any employee or family member can reach a nation-wide network of Employee Assistance Programs through a 24-hour toll-free telephone line (800/225-8451).

If a supervisor/manager perceives a possible drug problem, he/she must consult with the appropriate Human Resources representative about the process of intervention with the employee. Referral to the Employee Assistance Program should not be made in lieu of regular disciplinary action.

3. Violations of the Drug Policy.

With respect to violations of this Policy the employee may be terminated in any of the following circumstances:

- a. Confirmed illegal drug abuse and refusal to accept counseling or seek rehabilitation.
- b. Failure to be rehabilitated after a reasonable period of assistance and suspension.
- c. Manufacture, trafficking, possession or use of illegal drugs on ManTech premises or the premises of ManTech business partners.
- d. Conviction of an illegal drug offense, whether the offense occurred on ManTech premises or elsewhere.

4. Reporting of Drug Offenses.

If an employee is convicted of a criminal drug offense, the employee is required to inform ManTech within five (5) days. Depending on the customer, the contract type and/or the position held by the convicted employee, ManTech may have an obligation to notify the contracting officer(s) of the employee's conviction. In addition, for employees holding a security clearance, ManTech is required to report such convictions to the appropriate security officials.

K. Reporting Wrongdoing

Each ManTech employee has a duty to report any actual or suspected violation of these Standards. If any employee reasonably suspects that any employee or agent is involved in any sort of wrongdoing, has violated or is violating these Standards, the employee must immediately report those suspicions. In the event

that an employee feels that their report has not received appropriate attention, the employee shall report that information to the Corporate Compliance or Human Resources Departments.

ManTech encourages employee discussion with appropriate personnel regarding suggestions for preventing potential violations of these Standards. ManTech urges employees to work with their supervisors and their designated Ethics Representatives on these matters. However, if circumstances preclude effective resolution through these channels, employees should contact the Corporate Compliance Department directly. Employees who provide information may do so verbally or in writing. All information will be treated in confidence and ManTech will protect the anonymity of the employee to the maximum extent practicable.

HELP AND INFORMATION

ManTech has designated a number of personnel to assist its employees in resolving any questions involving ethics and conduct. Do not hesitate to seek help as needed.

Supervisors

Any employee that needs help or information regarding these Standards is encouraged to consult with his or her immediate supervisor. When this is not feasible, the employee should discuss the matter with the local or corporate Ethics Representative.

Ethics Program Representatives

The respective Human Resource Representatives have been designated as the local Ethics Program Representatives for each ManTech operation. These individuals have been identified to provide assistance to line management in the execution of these Standards.

Operations Compliance Representatives

In addition to the local Human Resources staff, the Group Presidents have designated senior staff members as Compliance Representatives for their respective organizations. It is the responsibility of these representatives to promote, reinforce and assist in the enforcement and execution of these standards. Please contact your supervisor or the Sr. Vice President of Corporate Compliance for the name of the Compliance Representative for your organization.

Senior Vice President of Corporate Compliance/Senior Vice President of Human Resources

These senior corporate representatives will respond to inquiries and resolve questions from the ManTech Human Resource Representatives as to actual or suspected violations of these Standards. They are also available to provide assistance to line management and employees with regard to these Standards.

Ethics Hotline

For those circumstances warranting complete anonymity of the employee, the Corporation has established an anonymous ethics hotline that is maintained by the Corporate Compliance office. The hotline is available to all employees Monday through Friday from 10:00 AM to 4:00 PM Eastern time.

Ethics Program Corporate Representatives Contacts:

1. Diane Moberg, Sr. Vice President, Corporate Compliance (703) 218-6309
2. David Scarffin, Director Internal Audit (703) 218-6491
3. Margo Mentus, Sr. Vice President, Human Resources (703) 218-6008

Ethics Hotline: Toll Free: (877) 637-8892 DC Metro: (703) 218-6120

DISCIPLINARY ACTIONS

Violations of these Standards will not be tolerated. Disciplinary action will be taken:

- . against employees who authorize or participate in actions which are a violation of these Standards;
- . against employees who deliberately fail to report a violation of these Standards or who deliberately withholds relevant and material information concerning a violation of these Standards;
- . against supervisors and management employees, to the extent that the circumstances of the violation reflect inadequate supervision or a lack of diligence;
- . against supervisors or management employees that retaliate, directly or indirectly, or encourage or knowingly permit others to retaliate, against employees who report violations of these Standards.

Disciplinary action will result in one or more of the following sanctions, as appropriate:

- . Verbal Warning;
- . Written Reprimand (to be part of the employee's permanent personnel record);
- . Probation;
- . Demotion;
- . Suspension;
- . Discharge;
- . Required reimbursement of losses or damages;
- . Referral for criminal prosecution or civil action.

As with all matters involving disciplinary action, principles of fairness will apply. Any allegation of a violation of these Standards will be reviewed and any employee charged with a violation of this code will be afforded an opportunity to explain his/her actions before any adverse disciplinary action is taken.

SUMMARY

ManTech seeks to conduct business at the highest possible ethical standards. As a result, ManTech's employees are responsible for ensuring that our personal conduct is above reproach. In cases where employees become aware of suspected violations of these Standards, they should report the situation to their supervisor(s) or Ethics/Compliance Representative(s).

These Standards will be enforced consistently in all subsidiaries and at all levels of ManTech. ManTech will keep confidential, to the extent possible, the identity of anyone reporting a possible or actual violation of these Standards subject to ManTech's Policy and Procedure and its obligations under the law.

Ethical conduct is everyone's obligation and the maintenance of these Standards is dependent on the collective judgment, knowledge and courage of all ManTech employees.

In addition to the local Human Resources staff, the Group Presidents have designated senior staff members as Compliance Representatives for their respective organizations. It is the responsibility of these representatives to promote, reinforce and assist in the enforcement and execution of these standards. Please contact your supervisor or the Sr. Vice President of Corporate Compliance for the name of the Compliance Representative for your organization.

Please fill in the required information below, sign and return this page immediately to your Human Resources Representative.

ACKNOWLEDGEMENT

I have read and understand the ManTech International Corporation booklet,

"Standards of Ethics and Business Conduct" and agree to comply with the policies set forth therein.
