2003 Annual Report

Secure Systems and Infrastructure Solutions

Information Technology Solutions

Systems Engineering Solutions

Leading the Convergence of National Security and Technology
Founded in 1968, ManTech International Corporation is a leading provider of innovative technologies and solutions for mission-critical national security programs for the Intelligence Community, the Department of Defense and other U.S. federal government customers. The company’s expertise includes software development, enterprise security architecture, information assurance, intelligence operations support, network and critical infrastructure protection, information technology, communications integration and engineering support. Over 90 percent of ManTech’s revenues are from defense and intelligence activities and the vast majority of the company’s 5,000 employees hold high level government security clearances. ManTech’s uniquely qualified employees have military and intelligence experience, security clearances and advanced information technology skills that allow us to address our customers’ key technology priorities and most pressing security needs—whether in secure environments or at front-line deployments. These capabilities, along with our comprehensive knowledge of our customers’ missions, enable ManTech to build and maintain long-standing relationships with customers. ManTech operates in the United States and over 30 countries worldwide. With more than thirty-five years of service to the U.S. government, ManTech is well positioned to continue this positive momentum in 2004 and beyond.

2003 Annual Report ManTech International Corporation 1
2003 was an outstanding year for ManTech International. We achieved record growth in revenue and earnings, successfully acquired two companies and expanded our business base.

**Strong Financial Performance**

Our revenues rose 40 percent to $701.6 million in 2003 compared to $500.2 million in the prior year. Operating income increased 58 percent to $61 million in 2003. Operating income margins, driven largely by improvements in contract margins and a shift in contract mix, improved to 8.7 percent during the year, up from 7.7 percent in 2002. Earnings per share on a fully diluted basis were $1.09 last year, a 47 percent increase over the $0.74 earnings per share in 2002.

**Disciplined Execution**

In 2003 we took advantage of significant opportunities in our markets and we boosted our internal growth by approximately 14 percent and continued to make strategic acquisitions. The acquisitions we made over the past year-and-a-half have enhanced our technical capabilities, deepened our penetration into select target markets in defense and intelligence, and contributed significantly to sales and profit growth. Throughout 2003 we remained true to the strategic course we charted in 2001 to apply ManTech’s innovative technologies and solutions to advance national security programs that support the war on terrorism.
In February of last year we acquired Integrated Data Systems (IDS), a company respected for its development of secure, advanced messaging and collaboration solutions that support national security networks and systems. IDS is one of Microsoft’s leading certified partners supporting U.S. government classified intelligence community programs. In March 2003 we acquired MSM Security Services, Inc., a leading provider of personnel security investigation services that performs background investigations used in the U.S. government’s clearance process. These acquisitions, combined with Aegis Research and CTX Corporation, acquired in 2002, have significantly increased our support of the Department of Defense and the nation’s intelligence programs. They have all been fully integrated into our corporate family.

Most recently, we acquired the operations of Affiliated Computer Services Inc. that support the U.S. Air Force Electronic Systems Center at Hanscom AFB, Massachusetts and the Air Intelligence Agency at Lackland AFB, Texas. This acquisition, completed in February of 2004, supports a key objective of our strategy to broaden our support to the U.S. Air Force.

**Strategic Progress**

Each acquisition has met our requirement to be a “force multiplier,” allowing us to bid on larger, more complex contracts to a more diversified customer base. In 2003 we won contracts with a value of approximately $1 billion and our business pipeline grew to $5 billion. Our backlog at year-end was $1.5 billion and our funded backlog grew to $375 million.

Today, approximately 95 percent of our revenue is derived from our defense and intelligence customers, up from 86 percent a year ago. The U.S. defense appropriations budget grew to $487 billion in 2004 and we believe it can continue to increase in 2005 and beyond. The Defense, Intelligence and Homeland Security organizations will increasingly require far more sophisticated information technology, communications, security and intelligence collection systems—which we are actively engaged in developing. Consequently, we see a continued strong demand for our services in the years ahead.
Letter to Our Shareholders (Continued)

Our Employees
ManTech’s success is attributable to our employees who support critical missions here at home and abroad for the Department of Defense, Intelligence Community, the Department of Homeland Security, the Department of Justice, the FBI, U.S. Citizenship and Immigration Services, IRS, Bureau of Immigration and Customs Enforcement, other agencies, as well as the nation’s space and environmental programs. Many of our employees serve in hostile environments in countries around the world, some on year-around assignments, and others on short, discrete and dangerous missions. For example, you will find ManTech employees on the battlefield and at many of America’s embassies around the world. You may have also heard, via a CNN story, how ManTech employees supported the technology and the efforts to help capture Saddam Hussein. We are grateful to our employees, are proud of them, and we commit our resources to ensure their safety and the success of their missions.

Creating Shareholder Value
We have a dedicated workforce, a very strong balance sheet, minimal debt, the financial resources to meet our goals—and we are in a time of expanding defense budgets. ManTech possesses a talented management team, ably supported and guided by an exceptional Board of Directors and Advisory Board. Leveraging those assets, we will continue to follow the course we have charted as we focus on executing our strategic plan: supporting our customers and their mission-critical needs, generating solid profit and revenues, expanding our opportunities, optimizing resources and creating shareholder value.

Sincerely,

[Signature]

Forward-Looking Statement

Certain statements and assumptions in this annual report contain or are based on “forward-looking” information that ManTech International Corporation believes to be within the
definition in the Private Securities Litigation Reform Act of 1995 and involve risks and uncertainties, many of which are outside of our control. Words such as “may,” “will,” “intends,”
“should,” “expects,” “plans,” “projects,” “anticipates,” “believes,” “estimates,” “predicts,” “potential,” “continue,” or “opportunity” or the negative of these terms or words of similar
import are intended to identify forward-looking statements.

These forward-looking statements are subject to known and unknown risks and uncertainties, which could cause actual results to differ materially from those anticipated, including,
without limitation: adverse changes in U.S. government spending priorities; failure to retain existing U.S. government contacts or win new contracts; failure to obtain option awards,
task orders, or funding under contracts; risks of contract performance; risks of contract termination, either for default or for the convenience of the U.S. government; adverse results
of U.S. government audits of our U.S. government contracts; and risks associated with complex U.S. government procurement laws and regulations. These and other risk factors are
more fully discussed in the section entitled “Risk Factors or Risks Related to the Company Business” in ManTech’s Annual Report on Form 10-K filed with the Securities and Exchange
Commission on March 15, 2004 and, from time to time, in ManTech’s other filings with the Securities and Exchange Commission, including among others, its reports on Form 8-K
and Form 10-Q.

The forward-looking statements included in this annual report only are made as of the date of this publication and we undertake no obligation to the publicly update any of the forward-
looking statements made herein, whether as a result of new information, subsequent events or circumstances, changes in expectations or otherwise.
